4. FAR 52.209-5 CERTIFICATION REGARDING RESPONSIBILITY MATTERS (AUG 2020) (Applicable if the Purchase Order exceeds the SAT.)

(a) (1) The Seller certifies, to the best of its knowledge and belief, that—

(i) The Seller and/or any of its Principals–

(A) Are not presently debarred, suspended, proposed for debarment, or declared ineligible for the award of contracts by any Federal agency;

(B) Have not, within a three-year period preceding this offer, been convicted of or had a civil judgment rendered against them for: commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public (Federal, State, or local) contract or subcontract; violation of Federal or State antitrust statutes relating to the submission of offers; or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, tax evasion, violating Federal criminal tax laws, or receiving stolen property (if Seller checks “have”, the Seller shall also see [52.209-7](#), if included in this solicitation);

(C) Are not presently indicted for, or otherwise criminally or civilly charged by a governmental entity with, commission of any of the offenses enumerated in paragraph (a)(1)(i)(B) of this provision;

(D) Have not, within a three-year period preceding this offer, been notified of any delinquent Federal taxes in an amount that exceeds the threshold at [9.104-5\(a\)\(2\)](#) for which the liability remains unsatisfied.

(1) Federal taxes are considered delinquent if both of the following criteria apply:

(i) *The tax liability is finally determined.* The liability is finally determined if it has been assessed. A liability is not finally determined if there is a pending administrative or judicial challenge. In the case of a judicial challenge to the liability, the liability is not finally determined until all judicial appeal rights have been exhausted.

(ii) *The taxpayer is delinquent in making payment.* A taxpayer is delinquent if the taxpayer has failed to pay the tax liability when full payment was due and required. A taxpayer is not delinquent in cases where enforced collection action is precluded.

(2) *Examples.*

(i) The taxpayer has received a statutory notice of deficiency, under I.R.C. § 6212, which entitles the taxpayer to seek Tax Court review of a proposed tax deficiency. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek Tax Court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.

(ii) The IRS has filed a notice of Federal tax lien with respect to an assessed tax liability, and the taxpayer has been issued a notice under I.R.C. § 6320 entitling the taxpayer to request a hearing with the IRS Office of Appeals contesting the lien filing, and to further appeal to the Tax Court if the IRS determines to sustain the lien filing. In the course of the hearing, the taxpayer is entitled to contest the underlying tax liability because the taxpayer has had no prior opportunity to contest the liability. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek tax court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.

(iii) The taxpayer has entered into an installment agreement pursuant to I.R.C. § 6159. The taxpayer is making timely payments and is in full compliance with the agreement terms. The taxpayer is not delinquent because the taxpayer is not currently required to make full payment.

(iv) The taxpayer has filed for bankruptcy protection. The taxpayer is not delinquent because enforced collection action is stayed under 11 U.S.C. 362 (the Bankruptcy Code).

(ii) The Seller has not, within a three-year period preceding this offer, had one or more contracts terminated for default by any Federal agency.

(2) “Principal,” for the purposes of this certification, means an officer, director, owner, partner, or a person having primary management or supervisory responsibilities within a business entity (e.g., general manager; plant manager; head of a division or business segment; and similar positions).

This Certification Concerns a Matter Within the Jurisdiction of an Agency of the United States and the Making of a False, Fictitious, or Fraudulent Certification May Render the Maker Subject to Prosecution Under Section 1001, Title 18, United States Code.

(b) The Seller shall provide immediate written notice to the Contracting Officer if, at any time prior to contract award, the Seller learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.

(c) A certification that any of the items in paragraph (a) of this provision exists will not necessarily result in withholding of an award under this solicitation. However, the certification will be considered in connection with a determination of the Seller's responsibility. Failure of the Seller to furnish a certification or provide such additional information as requested by the Contracting Officer may render the Seller nonresponsible.

(d) Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render, in good faith, the certification required by paragraph (a) of this provision. The knowledge and information of an Seller is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.

(e) The certification in paragraph (a) of this provision is a material representation of fact upon which reliance was placed when making award. If it is later determined that the Seller knowingly rendered an erroneous certification, in addition to other remedies available to the Government, the Contracting Officer may terminate the contract resulting from this solicitation for default.

5. FAR 52.209-13 VIOLATION OF ARMS CONTROL TREATIES OR AGREEMENTS-CERTIFICATION (NOV 2021) (Applicable if the Purchase Order exceeds the SAT, unless the exception at 9.109-3 applies. Commercial products and commercial services as defined at FAR 2.101 are also exempt.)

The Seller certifies that-

(i) It does not engage and has not engaged in any activity that contributed to or was a significant factor in the President's or Secretary of State's determination that a foreign country is in violation of its obligations undertaken in any arms control, nonproliferation, or disarmament agreement to which the United States is a party, or is not adhering to its arms control, nonproliferation, or disarmament commitments in which the United States is a participating state. SELLER ENVIRONMENTAL AND SAFETY GUIDELINES

Emergency Response/Spills

In the event of a medical emergency, fire, chemical/fuel spill or other hazardous condition, Seller must immediately notify Buyer Security by calling **210-522-2222** to initiate a response from Buyer personnel and emergency responders, if appropriate. When a spill occurs, Seller must report the location, identity, and amount of spilled material (if known) and if there are immediate

environmental or safety hazards (e.g., exposed personnel, fire or material entering sewers). If the spill is of a reportable quantity, then Buyer must notify governmental officials within 24 hours.

SAFETY REQUIREMENTS

Buyer's Environmental and Safety Systems Department ("ESS")

Phone: 210-522-2221

Seller must comply with all applicable federal, state, and local safety and human health regulations.

Traffic Control

Where traffic diversion is necessary, Seller must provide appropriate signage and coordinate through Buyer's Security Department. Barricades and/or warning devices that alert others of construction hazards must be used to control traffic, both vehicular and pedestrian, safely through or around the work site. Yellow caution tape and/or cones are appropriate for temporary use (<48 hrs) or in an emergency.

At no time shall a Seller or its employees override any locks or tags encountered during the performance of work. Seller shall develop, implement and maintain a Lockout/Tagout program in accordance with OSHA regulations, use their own locks and keys, and make such program available for examination upon request by Buyer. Whenever Seller and Buyer personnel must perform overlapping LO/TO, both LO/TO programs must be coordinated to comply with the Buyer's LO/TO program.

Electric Work

Seller shall ensure that only qualified Electricians work on Buyer electrical systems and equipment. All work shall be conducted in accordance with OSHA regulations and the National Fire Protection Association (NFPA) 70E Standard for Electrical Safety in the Workplace. Seller should not leave electrical boxes, switch gear, cabinets, or electrical rooms open when unattended. Seller shall coordinate requests for shutdowns and/or power outages with Buyer's Facilities. Under no circumstances shall utilities be shut off without a minimum 24-hour prior approval by Facility Operations and the Division representative.

regulations. Seller is required to provide its own rescue equipment, air monitors, ventilation fans, personal protective equipment, communication equipment, adequate lighting equipment, barriers and shields and/or equipment for safe egress, etc. to safely complete confined space entries. Sellers who are required to enter into any confined space on Buyer's property shall be required to have successfully completed an OSHA compliant Confined Space Entry training course on Permit and Non-Permit entries prior to performing this task and certify completion utilizing the Buyer form ESS-F217.03, [Non-SwRI Employee Confined Space Training Certification](#) form. Seller shall provide at least 24-hour advance notice to Facilities before Seller personnel will be working in a confined space on Buyer's property.

The excavator will use non-mechanical means (hand-digging) when digging within 18 inches of a marked underground utility. Utilities must be supported within an excavation to prevent collapse. Adjacent structures must be shored and/or protected in accordance with the design documents to prevent collapse. Fall protection should be installed around the perimeter of the excavation.

ENVIRONMENTAL REQUIREMENTS

Buyer's Environmental Policy is available to Sellers through the Buyer's web site (www.swri.org). Sellers working on-site are required to conform to Buyer's environmental requirements as outlined below.

Containment of Chemicals, Fuels, and Oils

Raw Materials and Waste

Secondary containment must be provided for the following:

1. Raw materials (fuel, oil, solvents, antifreeze, etc.);
2. Liquid and solid industrial / hazardous waste; and
3. Wastewater.

Secondary containment must consist of sealed concrete, welded metal containers, or preformed chemical-resistant plastic containers designed for chemical containment. Seller should consider covering containments to prevent rain/sleet and debris from accumulating.

Equipment

All equipment must be maintained in good working order and checked for fluid leaks prior to operation on each shift. All leaks found must be repaired prior to utilizing the equipment. Measures must be taken to ensure spills are prevented during fueling operations. Oil changes must be done so that the oil is drained into a containment pan located inside a containment area.

Refrigerant Systems

Seller must coordinate with Buyer's Heating, Ventilation, and Air Conditioning section within the Facility prior to commencing work on any refrigerant-containing system(s) or equipment. Contact 210-522-2106 for more information.

Seller must obtain approval from ESS prior to disposing of any wastewater in the sanitary sewer system. Stormwater collected in Seller secondary containment is considered wastewater and must be managed as wastewater.

Chemical Identification

Seller must label all raw material containers with the contents of the container and Seller's name. The Seller shall develop or have their own Hazard Communication Plan that complies with 29 CFR 1910.1200. The Seller shall have copies of Safety Data Sheets (SDS) on-site and available for review for all hazardous materials stored or used on Buyer's property. The Seller may request and review SDSs for any materials that they may encounter on Buyer's property during the performance of work.

The volume of chemicals brought on-site must be strictly limited to what is needed for immediate use. Deliveries should be coordinated by Seller "just in time" for use to avoid prolonged storage periods. Seller must remove all unused raw materials and empty containers from the work site prior to vacating.

Waste Management/Disposal

Seller must adhere to federal, state, and local environmental regulatory requirements, as well as Buyer rules and policies, regarding waste management and disposal. Disposal requirements may be decided prior to commencement of work, depending on the job scope. It is Seller's responsibility to provide advanced notice of the amount, type, and timing of the waste generation by contacting Buyer's ESS at (210)522-2221.

Seller must ensure waste is segregated into the following categories and manage the waste accordingly:

- Hazardous (e.g., fuels, acids, aerosol cans)
- Universal (e.g., light bulbs, batteries, paint/paint related waste)
- Class I Nonhazardous (e.g., contaminated soils)
- Class II Nonhazardous (e.g., general trash)
- Construction Debris (e.g., brick, concrete)
- Recyclables (e.g., metal, cardboard, wood, used oil, plastics, etc.)

Seller must ensure that waste containers are:

- Properly labeled;
- Compatible with the waste generated;
- Kept closed except when adding waste (e.g., drums: bungs on closed-top and lids with rings on open-top must be in place and tightened); and
- Inspected daily for leaks, signs of corrosion, or damage.

Any improperly labeled, leaking, damaged, or corroded containers must be immediately remedied or properly managed as waste. Seller is liable for any corrective actions and disposal costs.

Water Supply

In order to protect Buyer's public drinking water system from contamination and pollution that could result from improper system construction or configuration, Sellers must follow the most current City of San Antonio Plumbing Code practices during construction and installation. In addition, Seller must comply with the following unacceptable practices that are prohibited by the State of Texas:

- No direct connection between Buyer's water supply and a potential source of contamination is permitted. Potential sources of contamination must be isolated from the public water system by an air-gap or an appropriate backflow prevention device.
- No cross-connection between the public drinking water supply and a private water system is permitted. These potential threats to the public drinking water supply must be eliminated at the service connection by the installation of an air-gap or a reduced pressure-zone backflow prevention device.
- No connection which allows water to be returned to the public drinking water supply is permitted.
- No pipe or pipe fitting which contains more than 0.25% lead may be used for the installation or repair of plumbing at any connection which provides water for human use.
- No solder or flux which contains more than 0.2% lead can be used for the installation or repair of plumbing at any connection which provides water for human use.

Seller must immediately remove or adequately isolate any potential cross-connections or other potential contamination hazards and, at the Seller's expense, must properly install, test, and maintain any backflow prevention device required by Buyer. Copies of all testing and maintenance records must be provided to Buyer upon request.
