JOIN OUR NEXT INFO SESSION

**Bloom is built with an eye toward the future.**

Founded by educators, entrepreneurs, and engineers, Bloom KKCA Academy provides an innovative G1-6 bilingual, project-based education. From a NASA engineer to a forest educator, our teachers are what make Bloom special.

## International schools live up to high expectations

Have you noticed that international school children actually look forward to attending classes everyday?

It is widely acknowledged that they are generally more lively, joyful, open-minded and warm-hearted because the holistic education they receive not only stand them in good stead for further education, whether locally or overseas, but also expand their horizon and hone their character development.

Parents' general dissatisfaction, disappointment and even exasperation with the mainstream education system is reflected vividly in the growing popularity of international schools where the emphasis is on quality as opposed to quantity in both teaching and learning. While traditional schools concentrate on dishing out information en masse to complete a demanding syllabus, international schools provide the facilities, the environment, and the support for students to seek the knowledge and answers for themselves.

International schools offer a welcome alternative because of their broader curriculum and well-researched teaching methodology. In addition to academic pursuits, their students are excellent communicators as they come into contact with school mates of different ethnic backgrounds. The confidence and the reasoning power they have built up enable them to develop into creative and independent problem-solvers, as well as caring global citizens.

This guidebook contains the most updated information on international schools, and provides answers to a comprehensive range of questions to help you make the optimum choice for your children.

## The Environment – More than just a Physical Space

Written by Renee Wheeler, YCIS Educator

**“The wider the range of possibilities we offer children, the more intense will be their motivations and the richer their experiences”.**

-Loris Malaguzzi

In Early Childhood Education at Yew Chung International School (YCIS), the role of the environment is one that is multi-faceted. The environment is more than just the physical space. It includes the materials we use in lessons, the warm and responsive interactions between children and adults, as well as an environment that promotes the physical, social, emotional, and intellectual development of young children.

At the heart of our environment is a strong ‘image of the child’. Children are viewed as competent, curious, full of knowledge and potential, and interested in connecting to the world around them. YCIS teachers are deeply aware of children’s potential and therefore plan appropriate experiences for them, carefully constructing their environments to allow for these learning opportunities. We have an Emergent Curriculum where we observe children’s interests and plan for these using the information gained through observations of learners, interpretation, and collaborative dialogue with colleagues. Teachers will then plan ways to support children’s curiosity and engage in further investigation. As we plan for these learning opportunities for children, we look closely at the materials we can provide to support children’s interests and curiosities.

We offer children materials that promotes the type of thinking that leads to problem solving, reasoning, ability to think imaginatively and bring a sense of excitement to children’s play. Within our classroom environments we will use materials to provoke children’s thoughts, discussions, questions, interests, creativity and ideas. The environments are intentional in the use of materials so that they provide an invitation for children to explore and express themselves.

Children thrive in indoor and outdoor spaces which invite them to imagine, think, wonder, investigate, create, solve problems- especially in spaces where they can make meaning of their experiences. Our environments support children to be autonomous and independent, so that they can develop to their full potential.

YCIS campuses provide a stimulating, high quality learning environment that supports children’s learning and their holistic development. We see that children who are a part of our school, know that the environment is for them, where they will continue to grow into confident and capable learners.

# YCIS students receive all-rounded support to shine in IB examination

Established in 1932, Yew Chung International School (YCIS) has been an outstanding education institution in nurturing all-rounded and globally-minded students over the past 90 years. Its students hold a record of excellent academic achievements and 100% admittance to world-class universities. Its Careers and University Guidance Office (CUGO), comprising a team of expert counsellors, is key to helping students identify their academic and career interests, and boosting their chance of success with their university applications.

This year, despite the challenges brought on by the pandemic, YCIS students once again achieved brilliant results at the 2022 International Baccalaureate Diploma Programme (IBDP), with two students obtaining a perfect full score of 45 points, five students with 44 points and nine students with 43 points. Overall results are equally impressive: out of the 81 students registered for the IBDP, 35 obtained a creditable score of 40 or above.

## Enoch Cheng

Enoch likes maths and enjoys participating in competitions to challenge himself and sharpen his problem-solving skills. He received assistance from the CUGO, which helped him choose which subject to pursue at university and guided him with

his university admissions process. He will be going for a Double Degree Programme in Quantitative Finance and Management at the University of Toronto.

Apart from maths and business management, he is also concerned with the world around him: he is a co-founder of YCIS's Green Earth Association and his efforts are rewarded as he is the recipient of YCIS's Environmental Award.

"YCIS offers volunteering opportunities in which I helped underprivileged children and hosted a summer camp for ethnic minority kids," he says. "I enjoy doing volunteering work very much as I can contribute to society and it gives me confidence."

As for IB, he approached with calmness: "It is not as difficult and horrible as others say," he says. However, he urges students to use their time wisely and to start working on IA (Internal Assessment, a course requirement for IBDP) and assignments in the summer of Year 12 as there will not be enough time to deal with these things in Year 13.

Here, top scorers at YCIS recount how they went through the rigorous IBDP exams and are ready for a bright future ahead. Their stories also reveal how YCIS, true to its mission, aligned students with Science and Technology, Art and Culture, and Love and Charity.

## Marconi Shung

Marconi thanks his parents and sister for their unwavering support which is his powerhouse to persevere, and his friends who kept him mentally in check and urged him to keep fighting. But what pushed him to his limits was a clear goal:

a conditional offer from the London School of Economics and Political Science to study Actuarial Science. The CUGO also supported him by identifying his areas of interest and exploring career paths. "I received one-to-one guidance from counsellors and I did tests throughout the first year of my IB," he recalls.

YCIS offers "World Classroom" and "China Classroom" overseas excursion programmes, including community service and collaboration with local students in the visiting countries and cities. He is fortunate that his trips to the U.S.A. Kennedy Space Centre, Prague, Peru, Beijing, Taiwan and Taiyuan were held before travel disruptions due to the pandemic. "It was a valuable opportunity to explore the world, and embrace cultural diversity; although we missed witnessing the rocket launch by a day, we learnt a lot about STEM and robotics in one of the trips," he says.

He believes that co-founding YCIS's Green Earth Association, initiating garbage collection hikes and volunteering in charitable organizations are ways to put love and charity into action. "I become more compassionate with people and can contribute to the environment," he adds. And his study tip? "Set a clear goal and work towards it," he replies.

## Mechina Wang

Interstellar, The Martian and Ender's Game are science fiction movies and books which Mechina enjoys. She doodles with digital art, plays board games, and joins Go tournaments in her spare time. Her pastimes seem creative, intellectually

stimulating and require thinking a few steps ahead. Perhaps that is why she plans to study Economics and probably minor in Astro-physics at the National University of Singapore.

She is thankful that CUGO counsellors always offer guidance and advice. Teachers, too, were always there, especially to help with her IA. She finds that everyone is incredibly helpful. "YCIS provides a sense of community and support, and everyone tries their best to help you," she says.

Physics and chemistry experiments could only be watched online when classes were suspended during the pandemic. Teachers would take it one step further to go to the lab and show every step of the experiment. Classmates, too, would help one another and share study notes.

She is particularly grateful for her maths teacher who created his own mock exam questions, listed every step of the calculations in detail and explained all the traps and tips which she finds very useful.

## Sophie Lau

Sophie points out that a supportive environment is what makes YCIS special. "YCIS has a friendly atmosphere," Sophie points out. "Instead of being competitive among ourselves, students work together and generously share resources so everyone can get good grades."

She notes that besides giving students past papers for reference, high-quality teaching materials and handy revision notes, teachers at YCIS are also helpful with individual guidance. For instance, there was once when she did poorly on a test, the teacher conducted a review with her and encouraged her to dwell on the positive, which she finds most heartening.

As a top student who has won multiple Best Achievement Academic Awards in school, Sophie will be reading Economics at the Tsinghua University. "I am interested in markets, the government and businesses but I only have a basic concept of economics so far," she says humbly as she aspires to work in business and finance.

Looking back at Year 12 and Year 13, she says studying for IB was demanding, especially the stressful mock exams, but it was the best two years of her school life during which she spent a lot of time with her friends while motivated to work hard. "Work hard and play hard" is her tip to upcoming IB students.

## Isabel Hong

Isabel is the recipient of YCIS's prestigious Director's Award and numerous academic awards, yet what she likes most about YCIS is the learning opportunity outside the classroom. "We have an Experiential Learning Week, which is a break from school lessons to learn about megatrends and discuss hot topics of the real world," she says. "Rather than just being a student, these activities build us up to be a member of society."

Aspiring to work in a global organization or an NGO to help those in need, Isabel will take a Dual Degree in Economics, Finance and Management at the University of Hong Kong/ Peking University. As the programme is very competitive, she is grateful for the CUGO counsellors' guidance in navigating the complex application process, especially with the personal statements and recommendation letters.

"IB is the hardest course you can take, but it is good training for time management, organisation and thinking skills," she says. She explains that the first year was less stressful than expected as it was mainly learning and taking exams. Still, IA and university applications kicked in, making the workload arduous.

Her advice to prospective IB students is: "Plan ahead and get things done in the summer of Year 12 and draft your IA; find out which are your weaker subjects to which you should allocate more time and effort, and get enough sleep!"

## Senny Fu

Senny will pursue her studies in Biochemistry at the Imperial College London as she really likes the subject and hopes to work in genetics and DNA, especially in the field of disease and cancer.

Brimming with good vibes, she describes YCIS as a platform where she made good friends and where there are high-quality teachers who go beyond teaching. "Our teachers truly guide us and respect us. They let us study at our own pace and need not follow theirs," she says. She particularly highlights her excellent maths teacher who is meticulous, patient and thoughtful.

She recommends IB students to "work hard and work smart": "Do not spend all your time perfecting one subject; instead, work on your weakest subjects," she says. "Get help from teachers, ask your friends, and help each other."

"Despite all the stress, IB is a good high school curriculum which prepares you for university and beyond," she sums up. "It is a fruitful experience."

## More top tips for successful online applications

Application season is September - December.

**We've been doing this for more than 10 years and, during that time, almost all schools have moved from paper forms to online systems. Each school uses a different system and some are better than others, but we have learned what works and what doesn't and we're sharing that with you here.**

It can go very wrong. One parent contacted us only after receiving a rejection from her school of choice. Upon investigation, we identified that the school had assessed the child for the wrong grade and no-one had noticed. We were, thankfully, able to reverse that decision.

So, here are :

### Top Schools' Top Tips for Online Application Forms

- Draft the application offline - especially the essay questions. Then cut and paste the text in the relevant application forms. Easy to edit, easy to share for comments, creates a back-up and you won't get timed out of the system!

- Recycle essay answers, but always tweak them to fit the school.
- Make sure that all supporting documents are in the correct format. Send **everything** that they ask for but **nothing more\***.
- Ensure that the photograph is a good clear head and shoulders shot with a plain background. No need for a professional studio shot. We usually recommend a fun activity ie watersports, beach, hiking, etc
- Some school systems prefer certain browsers. Understand these before beginning.

- It doesn't matter when you submit the application within the admissions window, as long as you don't submit it late.
- Disclosure is better than discovery. If your child has any learning needs, disclose.
- Do not put English down as your/your child's first language, unless it really is. In HK, this is not always clear but if one or both parents are native in English and their first words to your child were in English and they will (later) discuss intimate matters of the heart/deep philosophical issues with your teen/adult child in English, you can safely put English as their first language.
- Take screenshots of each page (in case the worst happens and you lose everything!) It happens more often than you might think.

Often times, parents do not check that the application is received. Because we understand each school's process, we know all the steps and are able to move things along if they get stuck.

Many times, an application sits in a 'pending' pool as the school is waiting for documents or some clarification and the parents miss this.

### Need Support?

We follow our clients' applications closely. If you feel you might benefit from expert support, please get in touch earlier rather than later (before you submit any applications).

\* We do sometimes recommend a cover letter of sorts, but DO NOT send in a portfolio or certificates of your child's achievements which is what parents have traditionally submitted for local schools.

## Holistic American & International Education at ASHK

American School Hong Kong (ASHK) is a Reception (age 5) to Grade 12 international school located in the peaceful Tai Po community. With a rigorous American and international program, our inquiry and concept-based approach to teaching and learning promotes the development of 21st-century skills to prepare our students for their future. Students from Reception to Grade 10 are offered the US Common Core curriculum, while students from Grade 11 to Grade 12 are offered the International Baccalaureate® Diploma Programme (IBDP).

At ASHK, students experience a culture of creativity and innovation through the STEAM program. Students are guided through the Engineering Design Process (Ask, Imagine, Plan, Create, and Improve) to encourage innovation and creativity. Students learn to ask critical questions, research the problem, develop possible solutions, build prototypes, test and evaluate their designs, and then redesign as needed. The STEAM program equips students with the necessary skills to succeed in a global economy, such as critical thinking, problem-solving, and collaboration skills. While intellectual development is of paramount importance, significant emphasis is placed on the social, physical, emotional, and creative domains to provide a holistic experience for the development of the whole child. In addition, ASHK provides service opportunities and field trips for students to broaden their horizons, allowing them to become internationally-minded global citizens.

Dedicated to the vision of supporting students to achieve their fullest potential and celebrating the bilingual community, ASHK has a comprehensive English support program catered to every student's needs. Students benefit from an

academically rigorous curriculum while being supported to acquire the English language skills they need to succeed. Our experienced specialist language teachers nurture students to success by providing targeted instruction for English language development while enabling them to access the entire curriculum.

Fully accredited by the Western Association of Schools and Colleges, the Middle States Association of Schools and Colleges, and the International Baccalaureate Organization, ASHK is owned and operated by Esol Education, one of the world's largest operators of international American schools with over 45 years of excellence, serving more than 10,000 students worldwide. Graduates from Esol schools are now attending leading universities worldwide, including Stanford University, Massachusetts Institute of Technology (MIT), Yale University, Columbia University, University of Toronto, and the London School of Economics.

A rolling admissions scheme is currently in place at ASHK, allowing students to apply at any time throughout the year. The scholarship program also provides students an equal opportunity to enjoy this amazing educational experience, with financial assistance available.

# Student leadership shines through ‘A Dragonfly’s Journey’

Watch the mural creation

*A Dragonfly's journey is inspired by HKA's mascot, location and individual student pathways.*

Student leadership takes many forms at Hong Kong Academy, and a recent mural project was a fantastic opportunity for our student artists to apply their creative, collaborative and communication skills in celebration of the HKA community. The project's leadership team consisted of students from Grades 6 to 12 who were involved in concepting, designing and producing the finished piece. It was a privilege to see students integrate their own personal styles, share their ideas and appreciate the perspectives of others as we digitised the art and brought the composition together.

Consisting of 48 individual canvases, 'A Dragonfly's Journey' is the culmination of two years of creativity and

dedication and was hand painted by students, faculty, staff and parents during a collaborative whole-school event at the end of the 2021-22 school year. The mural celebrates our school's 20th anniversary and was conceived, donated and installed with the support of Stuart Harris, HKA parent and co-founder of Team Building Asia.

One student artist, Zoe A, was particularly dedicated and involved in all stages of the process, she shares her story below:

"I am so grateful to have been a part of this experience and it will always be a valued memory I have from being here at HKA. This mural required a lot of collaboration and hardwork, but I am so happy with the final outcome. At the beginning of designing the mural I felt a bit overwhelmed, as the pressure of working with others to create an artwork that would be available for anyone a part of the HKA community to see was a bit daunting. In the beginning, we brainstormed different elements that represented our community. As I collaborated and shared ideas with my peers, we were able to come together with different components we felt would

best represent Hong Kong Academy. It was so great to see so many different perspectives on our community and what makes it special. I enjoyed sketching different things like lanterns, dragonflies, city skylines, and of course the school's famous red doors. I was very surprised how even though everyone had unique and different art styles, Ms Oxford and some of the older students were able to piece everything together to create a seamless composition.

Although designing the mural was fun, my favourite part of this whole process was the painting day, where members of the HKA community of all ages got together to paint and have a good time! On the day of the mural, my role was to supervise and help out the people painting at my station. There were two canvases per station and there was a mixture of secondary and primary students working together for hour-long sessions. I also helped transfer paints to other stations to make sure colors were the same throughout the mural. It is great to see the mural hanging in the school and I am proud that I was able to introduce it to parents during Back to School night. Overall, it was such a fun experience. and I'm so glad I had this opportunity!"

# Wycombe Abbey School Hong Kong promotes interactive learning by applying Microsoft technologies

The epidemic has thrown a spanner in the works of local schools as students experience an unprecedented territory-wide suspension of classes. Wycombe Abbey School Hong Kong (WASHK) promptly took stock of the situation and devised a pragmatic solution, transforming the management of learning and the delivery of teaching to an online mode.

The school adopted Microsoft technologies to create an organizational structure of a virtual learning environment for students, teachers, and administrative staff. It was awarded 'Microsoft Showcase School' status, the first private school in Hong Kong to receive this honor.

"We are very proud that Wycombe Abbey School Hong Kong has been awarded the 'Microsoft Showcase School' status," enthuses Mr Howard Tuckett, Headmaster. "Since early in 2020, we have been working hard to achieve all the very exacting standards required by Microsoft to qualify."

The use and development of the Teams and OneNote technologies as the foundation of online learning provision has been a core aspect of the success.

Microsoft Teams, a collaboration communication platform, and OneNote, a digital class notebook, are used where all the materials and lesson plans are distributed to students for remote learning. For example, the assignments function connected to Microsoft Teams allows teachers to send assignments to students in a variety of accessible ways like video instructions. Teachers can give instructions and attach any materials that students need.

From students' perspective, they can do assignments digitally, send them to their teachers afterwards and respond instantaneously after receiving

feedback. The use of Flipgrid, a video discussion and video sharing app, gives confidence to students to express themselves while Minecraft Education Edition, a gamified learning virtual world, gives teachers opportunities to interact and engage in a more student-centered, creative and engaging way.

"Our students apply the technologies to innovate, problem solve and collaborate with others to find better solutions to the questions teachers have given to them," observes Mr Shahzada Janjua, Head of ICT & STEAM.

Microsoft supports and promotes the school's hybrid and personalized learning management system by offering staff training, technical support, and networks with other schools.

This allows WASHK to know more about how to incorporate Microsoft technologies throughout the school, with many gaining the certification of Microsoft Innovative Educators (MIE). Meanwhile, the leadership team actively

engage their school communities through surveys and questionnaires, incorporating their feedback into the processes and practices.

Looking ahead, WASHK will continue networking with other schools in Hong Kong, and on the international stage, to share knowledge of Microsoft technologies. Through diversified Microsoft webinars, teachers can learn more about how to apply the Microsoft systems and products productively with inclusive and active pedagogy, differentiation, and personalization.

# Nurturing Children at CAIS: Learning, Growing, Serving

## A Place to Belong

In 2017, Christian Alliance International School (CAIS) opened its campus nestled in Butterfly Valley, a name that carries special meaning to the school community and inspired the creation of the Butterfly Garden. For the school's 1,500+ students, the Academic Building is a place that they have grown to be familiar with – from the 70 classrooms, lecture hall, art room, multi-purpose areas, to the library – it is a place that fosters a sense of belonging.

In the 2022-23 school year, CAIS is unveiling the Phase IIA Amenities Building, which is set to deliver even more diversified options for students to achieve their aspirations and pursue all-round excellence both within and beyond the classroom. The new building includes a roof-top 7-a-side soccer pitch, gymnasium with an indoor rock-climbing area, and a music floor dedicated to nurture and showcase the virtuosity and expressive talent of CAIS students.

## Diverse Education Pathways

A through-train school, CAIS welcomes students of all backgrounds to its preparatory, lower and upper primary and secondary sections. The International Baccalaureate Diploma Programme (IBDP) is offered as an alternative pathway in addition to the Alberta (Canada) Curriculum and Advanced Placement courses. Students who opted for the IBDP have stepped into their second year of study and will proudly become the school's first cohort of IB graduates in 2023.

CAIS is committed to holistic development through academics, spiritual life, athletics, and the arts. New learning spaces include an orchestra room, a recording studio with

the latest technological equipment, and acoustically-furnished music rooms for lessons and individual practice. The Drama Studio intends to be a place to inspire budding performers, scriptwriters, producers, and even future directors. CAIS aims to offer a uniquely transformative educational experience where students can bloom and flourish.

## A Transformative Experience

From the very first time students walk through the school gates to the day they leave as proud graduates, the school envisions that each of them will experience growth and transformation, guided by a team of dedicated and highly qualified teachers.

CAIS continues to focus on improvement through its philosophy of *Kaizen*, which is to develop a growth mindset to change for the better, and continuous improvement. Head of School, Richard Vanderpyl, emphasized that at CAIS, wisdom is displayed through kindness, compassion, patience and serving each other, as reflected in the 2022-23 school theme – Walk with Wisdom: from the Word to the World.

## The French International School (FIS) has a long history of academic excellence and is rightfully proud of their students who are warm, open-minded, lively and grounded in the real world.

Established in 1963, FIS has always been an international education pioneer in Hong Kong with a unique outlook and approach. At the heart of their learning environment is bilingual education and with their unique mosaic of identities, with over 40 nationalities represented, the diversity of students and staff give excellent preparation for a world that is ever more complex and interconnected. It suits those parents who are looking not just for the academic success it brings their children, but for the school's holistic approach to education in the broadest sense.

FIS is a through-train school which accepts applications all year round. It offers students an education from the very start of their learning journey in the early years through to graduation, and research shows that there are many benefits associated with this. The school also offers an extensive extra-curricular programme which enriches student life and encourages them to discover new experiences and interests that can shape their future pathways. "Visitors often comment on the phenomenal opportunities for our students, both inside and outside the classroom, along with the enormous choice to develop their talents and skills," said Mrs Suzannah Denness, Director of Marketing Services.

In both the French and International Streams, FIS students' intellectual curiosity is nurtured with care by their teachers. Every member of staff plays a vital part in delivering a unique educational experience in a cohesive school environment in which students can thrive and be themselves. The French Stream prepares students for the French Baccalaureate which is renowned for its rigour, depth and breadth of subject areas. The International Stream prepares students for the IB which is an international qualification of high academic standing and recognised globally.

The FIS University Guidance Team is focused firmly on helping students with their university and careers research, providing resources to support them as they explore future

options and decide next steps. Both Streams prepare students to thrive in universities around the world and the destinations attest to this. They include top-tier institutions such as Oxford, Cambridge, UCL, Imperial College, Harvard, UC Berkeley, Ecole Polytechnique, Sciences Po, University of Toronto and HKU.

# ESF: Helping your child be the best that they can be.

The English Schools Foundation (ESF) is the largest international schools organisation based in Hong Kong. Our 22 schools – located across the City – combine to form an all-through education system for children aged three to 18. Put simply, this means that if your child joins us in Kindergarten, they will experience a world-leading ESF education until they finish their schooling in Year 13.

We may be big – we have 18,000 students and 4,000 staff – but our approach to education is built on a simple fact: each child is unique. We work with every single one of our students to understand them, to help them develop their skills and to bring out their passions. Walk into any one of our schools and you will see students who are happy, engaged and, above all, who are learning each and every day.

It is the approach, this understanding that no two children are the same, that is the foundation for the outstanding academic results that we achieve. There is no other way to say it – what we do is the envy of the world. This year alone, almost 7% of the students anywhere in the world who scored top marks in the IB Diploma did so at an ESF school. Our average scores don't just beat the global marks – we absolutely smash them.

It is no surprise, then, that ESF students can be found at all the top universities in the world.

And, because we understand our students, we know that there is more to them than their academic results. We want them to develop all their passions – be they sporting, artistic or in the fields of leadership and community engagement. When a student and their family join us, we make them a promise – that all of us will work tirelessly to help them be the very best that they can be.

It is a promise that every teacher works to deliver for every one of their students every single day.

Find out more about how your child could benefit from an ESF education at [www.esf.edu.hk](http://www.esf.edu.hk)

# Thinking beyond traditional education to transform learning

You want the best for your child. So do we. Nord Anglia International School Hong Kong (NAIS HK) educates your child for the future, enhancing learning through collaborations with the world's best organisations. We teach the most respected and robust educational programmes through collaborations with MIT and Juilliard, delivered in some of the best facilities in all of Hong Kong. Our individual approach to each child enables them to achieve outstanding academic results whilst developing the skills and mind-set to thrive in an ever-changing world.

NAIS HK offers an all-through education for students aged 3-18, with specialist teachers in Music, Art, PE and Mandarin from the very start of a child's educational journey with us. Our sole focus is on the success of each and every child. We want them to be the best they can be and we encourage them to "Be Ambitious", reflecting our school's philosophy. This means we support each student to progress further than they thought possible, achieving more academically, personally and socially – all of which are equally important.

At the heart of the school's success and excellent reputation, is the very high quality of teaching and learning delivered by our exceptional staff. Our teachers create an atmosphere of curiosity, passion and enjoyment for learning in all students. We are proud to attract the best specialist teachers who are committed to nurturing and inspiring every child they care for. We support them to do this through world-class professional development, amplified by the sharing of international best practice. Nord Anglia Education (NAE) offers our staff the opportunity to study for a fully-funded Master's degree from King's College London, underscoring our commitment to the career progression of each teacher. Teachers here teach children, not classes, so the focus is always on the child as an individual. We bring a new approach to the interdisciplinary subjects of STEAM (science, technology, engineering, arts, and mathematics), putting your child at the forefront of developing skills for the 21st century.

With over 40 nationalities represented in our own school, everyone learns to respect others regardless of differences in opinion, religion, race or ethnicity. All major festivals are celebrated and our annual International Day event is a culmination of the recognition that rich diversity is a strength. At NAIS Hong Kong, every day is an 'international day' as our pupils are part of the greater Nord Anglia Education family, with more than 80 schools in 31 countries, linked by our Global Campus. This allows students to co-operate with each other on projects and learning across the world, making them internationally-minded, effective global citizens of the future.

At NAIS Hong Kong, we offer the IGCSEs and IB Diploma Programme. This curricula provides the greatest success for the largest number of students. With our individualised approach to each child's learning, outstanding teachers and collaborations, and unique opportunities inside and outside the classroom, we promise to nurture your child to love learning and help them to achieve more than they ever thought possible.

We would love to welcome your family to become a valued member of our vibrant and growing global community. Join Nord Anglia International School Hong Kong today and give your child the very best education.

# Nurture future leaders by unlocking every learner's potential

Christian Alliance P.C. Lau Memorial International School (CAPCL) is a bilingual international primary school which adopts the Canadian Alberta curriculum suitable for children from preparatory (aged 5) to grade 6 (aged 11). Employing a unique combination of 65 % English and 35 % Mandarin Chinese teaching, CAPCL nurtures future leaders by unlocking every learner's academic potential.

At CAPCL, your child can seamlessly transition into a bilingual English and Chinese learning environment with supportive child-centred expertise provided by the school and its expert staff.

## Play-oriented Learning

CAPCL adopts a play-oriented mode of teaching into its bilingual curriculum to foster a better understanding of both the English and Mandarin Chinese languages, intergroup and interpersonal social skills, and a positive and enjoyable mindset to learning.

## Verbal and Non-Verbal Teaching

CAPCL's bilingual curriculum emphasizes verbal and non-verbal communication with its students. With this engaged approach, your child's language skills will flourish alongside their observational and social skills as they learn, play, and communicate through a variety of verbal and non-verbal languages with their classmates and teachers.

## Three "R"s Motto

CAPCL's teachers follow a strict three "R"s motto when it comes to aiding students to transition into a dynamic bilingual environment, eliminating unnecessary difficulties.

### 1. "Relational" teaching

Your child will be engaged in a network of support starting from day one, within a small classroom learning community of just 22 to 24 students per two teachers.

### 2. "Relevant" lessons

The curriculum is designed to encourage development from the perspective of children's interests. In this environment, your child can communicate their thoughts and contribute to class discussions in ways that are meaningful and impactful to their personal growth.

### 3. "Rigorous" curriculum

Whilst CAPCL reinforces a play-oriented approach in the classroom, teachers also ensure that lessons are engaging and challenging for every single student under their watch.

## Parent's Involvement

Parents' support in their child's transition into a bilingual learning environment will greatly improve their performances in class socially and academically—that is why CAPCL also puts emphasis on home-parent collaboration! Ongoing communication between parents, teachers, and students ultimately fosters the desire to participate in various activities in and out of school and, most importantly, the desire to learn.

## Christian-Based Education

A Christian establishment, CAPCL believes that every learner is special, unique, and valuable, and encourages each child to develop his or her God-given talent. At CAPCL, children's dispositions are revealed to us in their play, learning, and daily experiences.

## NIS: Where Students Are Joyful Learners, Inside and Outside the Classroom

Norwegian International School (NIS) is a small, happy learning community with a focus on nurturing children in a caring environment so they can thrive and enjoy their learning journey. Children's uniqueness is celebrated and they are encouraged to make a difference, to extend kindness and to be thoughtful in serving the wider community. NIS places great importance in character development alongside academics to help them grow holistically in and beyond school.

At both the Kindergarten and Primary School campuses, students at NIS are active, engaged and joyful learners who explore their world along with their peers through creative, thematic, enquiry-based units. These thematic units are looked at through different subject lenses so they can understand how the world is connected, and how their knowledge and skills can be applied in different ways to help them develop a deeper understanding of how things work. It encourages thoughtful questions from them and creative problem-solving.

The pursuit of academic learning at NIS is accompanied and strengthened by the school's focus on character

growth and development of international mindedness, with all three elements woven together as integral part of the International Primary Curriculum (IPC) and International Early Years Curriculum (IEYC). Eight personal goals are taught, modelled and developed in every subject and integrated throughout school life: ethical, respectful, resilient, adaptable, empathetic, communicator, collaborator and thinker. They are explicitly taught, practiced and applied in different ways.

Located in a peaceful, calm natural environment, learning in the classroom leads seamlessly into time spent outdoors, where students participate in investigations of living history using the natural life around them. The playground is spacious for students to run around with their friends at recess, and for our families to chat and enjoy each other's company while the students play after school. This is all part of NIS' unique close-knit family-like community.

NIS offers school tours, and would be delighted to introduce all interested families to this vibrant community. Please get in touch today!

# The Best Primary School in Hong Kong

Shrewsbury International School Hong Kong is celebrating its fifth academic year since foundation. Offering an unrivalled range of experiences and opportunities for learners between the age of 3 and 11, Shrewsbury is the only premium level provider of primary education in the region.

"We are a Primary School and the vast majority of benefits our students enjoy stem from this critical distinction: they are the sole occupants of our beautiful campus and the most significant consideration of school leaders and governors." Mr Ben Keeling, Principal

Learning at Shrewsbury is founded upon a thematic programme that encourages subject interconnection and runs in close alignment with the English National Curriculum. As a result, students develop their ability to think both creatively and critically within a safe, nurturing and inspiring space, designed for and exclusively used by young learners.

Weekly aquatics lessons supplement an ambitious physical education and performing arts programme facilitated by the availability of an incredible range of exceptional spaces, while a three-tiered Chinese language programme ensures that children of all ages and abilities develop confidence and practical fluency.

Home to a broad and diverse community of international families, the majority of students join Shrewsbury at the age of 3 or 5 and enter into a Nursery or Year 1 class, respectively.

A play centred framework defines the experiences of the youngest students. Children in Nursery classes learn through a process of personalised investigation guided by a highly skilled academic team who act to inspire purposeful, considered and conscious engagement - graduated access to a full specialist programme of study and a carefully managed series of interactions with older students provides a bedrock for further interconnection and the steady development of a supporting network.

"Nursery students love school - they engage boldly and with confidence, empowered by their continually developing linguistic skills. The close and trusting relationships we share act to guide personalised exploration and stir deep fascination." Aileen Doyle, Nursery Lead

The widening of capacity also supports seamless early entry to our Primary School. During Year 1, students are encouraged to develop an interconnected network of meaningful relationships, a passion for learning and an informed view of the world around them. The simultaneous

introduction of a House system and the widening of an already expansive Co-Curricular programme broadens social and intellectual contact during a critical phase of childhood development.

"Students in Year 1 are required to interconnect, both formally and incidentally - they rehearse and refine their social skills and in doing so develop the positive learning habits required for critical analysis and creative solution." Ellie Woods, Year 1 Lead

Parents keen to learn more about what makes Shrewsbury sparkle are encouraged to reach out direct via their admissions team.

'You only get one childhood and the experiences on offer at Shrewsbury have a life-defining influence. We provide each of our students with the attributes to thrive both within their primary years and beyond.' Mr Ben Keeling, Principal

# A 15-year international programme that nurtures innovative lifelong learners

Invictus School Hong Kong was established in 2019, with its kindergarten and primary school situated in Tseung Kwan O, and its secondary school in Chai Wan. With both locales being home to plenty of expatriate and local families in Hong Kong, the school is quickly becoming the school of choice for discerning parents in the city. Founded to provide quality and affordable education, Invictus utilises rigorous internationally renowned curricula, to help each child develop a spirit of lifelong learning and excellence.

Taking pride in its high-quality and accessible education, Invictus aims to nurture individuals in innovative and inspiring ways to become lifelong learners who contribute to a better tomorrow. Catering for children in K1 to Year 6 (ages 3-11), the modern campus housing Invictus Kindergarten and Invictus School (primary) offers an English / Mandarin bilingual immersion programme.

The curriculum of the school is very adaptive and flexible. Kindergarten follows the International Early Years Curriculum (IEYC), Singapore Mathematics curriculum, and a bilingual teaching method. In the Primary section, the International Primary Curriculum (IPC), Singapore Mathematics syllabus, and bilingual teaching method are employed. Furthermore, existing students could seamlessly transfer to other Invictus campuses across Asia, including Singapore, Malaysia, Thailand, and Cambodia.

Fiona Chan (Founding Principal, Invictus Kindergarten) points out that it is one of the few in Hong Kong to use traditional characters for Chinese. "Learning through both languages, in a nurturing and culturally aware environment, is a key part of the Invictus approach," she says. The learning journey takes children through the International Early Years Curriculum (IEYC), International Primary Curriculum (IPC), and Singapore Maths programmes, where each child has his or her own next steps. Christopher Jackson (Founding Principal Invictus School (Primary) sums it up by saying, "We aim to make the curriculum fit the child, not make the child fit the curriculum".

The newly-renovated secondary school campus for Years 7 - 13 (ages 11-18), offers the world-renowned Cambridge Curriculum. Beginning with a core foundation of subjects

in Year 7, the programme then offers flexibility in subject choices and student strengths, leading up to IGCSEs in Year 11 and A-Levels in Year 13. As in the kindergarten and primary sections, the focus is always on the individual as a learner. The campus is equipped with a wide range of facilities to support students' learning, including high-tech and environmentally-friendly laboratories, a spacious performance space, and designated drama, music, and art rooms. The Cambridge programme is complemented by an extracurricular one planned by the students themselves.

As a through-train school, children who join Invictus at the kindergarten level are also guaranteed a place in the primary and secondary sections. They will benefit significantly from the familiar environment, teachers, and peers.

Next, children are invited in for an assessment as part of the admissions process. At the kindergarten and primary levels, the assessment looks at age-appropriate language, academic, and social development. At the secondary level, a more formal admissions test is used, including a feedback report. Applications and enrollment can take place all year round.

The school promotes affordable international school fees as the target audience of Invictus are the local families. It is especially appealing to parents who want to spend less on their children's school fees but would like to get away from the mainstream schools.

Looking forward, the school will continue to emphasize the student-focused approach. "For us, holistic education doesn't just mean a wide range of subjects, but to grow the whole child and encourage them to think critically, creatively, and to be a part of society," Chris concludes.

Parents are more than welcome to find out more about the school through the personalised school tour! Please register by scanning the QR code, the team will be in touch with you shortly.

# Bloom KKCA Academy -- A Future-Oriented, Bilingual School of Innovation

Sweeping technological changes have reshaped our children's brains, future careers, the way they play, and the way they learn. It has made a lot of skills irrelevant and others essential. So what should innovative education look like?

Innovative schools that are excellent require a balance between structure and choice, between traditional and pioneering practices, decisions that take professional expertise, continuous negotiation, and genuine concern for students as individuals.

"It is with this understanding that our team takes on the challenge of building a one-of-a-kind learning community in Hong Kong that fulfills the promise of preparing students for purposeful work and meaningful lives," said Renée Boey, Founder and Head of School.

## Cultivating Compassionate Creators and Social Innovators

Bloom's curriculum has an eye toward the future. We teach innovation as a commitment to see possibilities through to realities, to imagine beyond the status quo, and to create fresh value. Our project-based learning modules examine human history through interdisciplinary lens, and each cumulates in students creating a product of positive change. The program develops enduring competencies and the disposition to embrace the open-ended nature of design problems. We take risks, learn from mistakes, and have the discipline to reflect and improve – together.

"Every student has a unique and interesting perspective on our world and can solve an impossible problem – if they ask meaningful questions and are supported by robust skills that set them up for a successful future," said Mei Chen, a former NASA engineer who is currently Bloom's STEM Director.

## Bilingualism and Dual Language Pathways

Our dual language program thoughtfully balances positive education with the academic demands of becoming biliterate in Mandarin and English. The 50/50 split reinforces our respect for both languages and different cultures and gives our students ample opportunity to function comfortably, competently, and confidently in both languages.

## Positive Education

Education should be inherently positive, yet unfortunately, schools often lose sight of the real reason they exist – the students. Through explicit and implicit focus on positive education we aim to build on and enhance each child's strengths and create a community of compassionate learners. Daily campfires as well as low student-teacher ratios allow us to focus on the whole child.

## City as Campus: Weekly Field Trips

Our campus extends far beyond the classroom. Bloom students embark on weekly field trips, from visits to organic farms to science experiments at the Aberdeen Reservoirs. Students make sense of what they have learned in the classroom out in the real world and bring back questions, observations, and ideas that motivate them to pursue learning within the classroom. These regular interactions with the community also allow for positive values to be translated into caring actions.

We invite you and your children to join us and experience what educator Dave Perkins calls a "Future Wise" education.

# A Fairchild Day Supports 21st Century Play

We all have heard the saying “an apple a day keeps the doctor away”. We at Fairchild believe that quality play every day supports all the skills which children need for the future. Increasingly, research tells us that high-quality, joyful learning is the key to happy, healthy and holistic child development, free from toxic stress.

Fairchild educators cultivate curiosity, creativity and confidence through our inquiry-based approach, inspired by the Reggio Emilia philosophy. The warm, nurturing welcome the children receive from their teachers as they arrive at school helps set a happy and positive mindset for the day.

In our classrooms, there will be many fun, hands-on provocations set up to promote children’s interest and inquiry. For example, sponge painting is a great fun learning experience for young children. The children love exploring with the texture of sponges and paints. It isn’t just about having fun creating patterns and making marks on paper, but it is also an excellent experience to extend hand-eye coordination skills and fine motor development.

Our younger pre-nursery children settle very smoothly into class, especially if they have attended our accompanied sessions at our playgroup campus in Tin Hau. Being already familiar with our Reggio Emilia inspired setting, which is a comfortable home-like environment, children are ready to engage in messy play activities, music and movement, quiet reading time, as well as group play in our outdoor treehouse and shared discovery spaces.

As children play, our passionate and dedicated educators build strong relationships through conversations with children, asking them questions about what they are doing, and capturing the children’s wonderings to see how their learning and interests can be extended. Not all children learn in the same way. Our Reggio inspired approach allows for

children to express themselves in numerous ways, known as the “100 languages” and helps children develop confidence and creativity.

Peer exchange takes place all the time in our classrooms, and you will be surprised at how much knowledge exchange takes place every day. From how to say the names of dinosaurs, to turtles swimming in shallow water, and telling our friends that we need a passport to get on a plane, children share and learn what they know with each other - an important collaborative skill for the future, as well as developing their skills as effective communicators.

Our classroom pets - turtles, fish, worms and a hamster - allow children to engage more with nature. Learning how to care for the animals and being kind to our earth helps develop their sense of civic responsibility too. Let’s play first, learning always naturally follows.

## The Importance of Optimising Learning Potential in the Early Years

By Khardine Rendall, Director of School Development  
MAGART International Kindergarten

With 90% of brain development happening before the age of 5, the role of early childhood education (ECE) is not simply to prepare children for primary school but also to set the foundations for lifelong learning, well-being and future abilities.

Through development of strong social, emotional, cognitive and physical skills; early childhood education is the building blocks for a successful future, and so it is important for parents to consider carefully and make the right choice for their child and family.

What are some of the things parents can be looking for?

### Environment

It is important to find an environment in which your child feels happy, safe and supported. When these basic physiological needs are taken care of children can truly start to learn and develop.

The environment must also be developmentally appropriate, have adequate space as well as appropriate and plentiful resources. At MAGART our environment is considered the 'third teacher' and each of our campuses is spacious and inviting, and well equipped with quality and natural resources for discovery and hands on learning.

### Curriculum & Learning Style

It is important for parents to choose a curriculum and learning style which is suitable for their child and will challenge and support them to reach their full potential.

Do you think your child will learn best in a passive and teacher-directed way? Or would they learn best through exploration, hands on learning and development of critical and logical thinking skills?

MAGARTs Enhanced EYFS curriculum is balanced with school based Chinese and logical-thinking mathematics to ensure we have a rigorous and challenging curriculum to support strong development of all 7 areas of learning. This ensures we can support all of our families into the next steps of their learning journeys (whether that be at top International or Local primary schools...or some families who are not yet sure which path they would like to take).

Join us for our seminar on October 22nd 2022 at The Standard International School Fair or visit us at our booth to learn more about the importance of early childhood education and optimising your child's full potential.

## Why is English literacy important in a future-led curriculum?

At Oxbridge School, we believe reading is a fundamental aspect of students' learning of the English language and that is why we follow an award-winning literacy curriculum that follows the UK National Curriculum. Reading helps children learn to make sense not only of the world around them but also people, building social-emotional skills and of course, imagination. Confidence in the English language greatly enhances opportunities in science, business, media and the internet, in all of which the language is pre eminent as it is in global travel and study. The Oxbridge book-based approach enables our students to focus their learning by having :

- **Thematic links** - each book within a term links themes and conventions that are significant to the literature.
- **Engaging starting points** - Dramatic conventions resonate with the students and create a hook which encourages students to want to know more.
- **Embedded comprehension** - Reading comprehension is embedded within the text creating purposeful opportunities for students to practice their skills.
- **Embedded grammar** - Explicit grammar skills for writing taught in a context that enables students to apply them purposefully.

All stories within our curriculum follow a termly theme. In Year 3 for example, Oxbridge students focus on disaster, hope & healing. They study 'The Pied Piper of Hamelin' with versions both by Robert Browning and Michael Morpurgo. They also look at the story 'Escape from Pompeii' by Christina Balit. Their story for example looks at the eruption of Mount Vesuvius in AD 79.

By engaging students in this book-centred approach, they become critical readers and acquire a myriad of skills as they encounter a wide-range of significant authors and a variety of fiction, non-fiction and poetry. With a fantastic book, language, vocabulary and grammar comes to life from the text and creates a perfect opportunity for vocabulary acquisition, where students feel inclusive and part of the process and students engaging in writing opportunities relating to the books being studied gives purpose to the student's work.

The Oxbridge curriculum gives students real reasons to read, write and understand, enabling them to explain, persuade, inform or instruct. All of which will be essential skills for our future world changers. Come and see our curriculum in action on a school tour!

- **Spelling & Vocabulary** - Explicit spelling skills are explored and linked to vocabulary acquisition.
- **Literacy language** - Explicitly taught and applied in our students' writing.
- **Purpose & Audience** - Distinct shorter and longer writing opportunities rather than genre-led

# Carmel School Fosters Independence and Resilience from the Start

Carmel School is an IB Continuum School (PYP, MYP and DP) with high levels of academic success and student wellbeing. Our School is based on the strong foundation of our Jewish ethos and philosophy, together with the unique opportunities and the breadth and depth provided by the International Baccalaureate (IB) Programmes.

From our unaccompanied one year olds on Robinson Road, to our curious PYP inquirers at the Carmel Elementary Borrett Road campus and on to accomplished MYP and DP learners at the Elsa High School Shau Kei Wan campus, Carmel School students acquire cutting edge 21st century skills and experiences within a rigorous academic framework.

Our ethos develops well rounded, happy students who give back to the community whilst focusing on self-development and maximising potential through the learning process. Small class sizes are matched with personalised learning delivered by passionate, highly qualified faculty. With a focus on independent learning, developing responsibility and resilience, Carmel students are communicators and collaborators encouraged to push boundaries, innovate, support others, and commit to lifelong learning.

Our pastoral care scheme and community setting are backed by an active PTA with strong community links, all of which provide our students with the support and confidence to achieve their dreams.

Carmel School's academic results are consistently excellent with a consistent track record of offers from top Universities worldwide including Oxford University, University of Cambridge, NYU, Durham University, McGill University, HKU, HKUST, Monash University, The Technion and more.

We are proud to celebrate our 30th year in operation and invite you to meet our students, faculty, and tour our facility. To schedule a visit please contact us.

# Personalized Experiential Learning at The Harbour School

The Harbour School (THS) is a progressive Pre-K to Grade 12 international school with three campuses on Hong Kong Island that aims to unlock the best in every student by taking a highly individual approach to teaching. The school was founded in 2007 and is already gaining a worldwide reputation as a center of excellence. It follows an American curriculum with an emphasis on 21st century skills such as problem solving, teamwork, creativity and innovation. The Harbour School is accredited by the Western Association of Schools and Colleges (WASC), one of the most rigorous and prestigious accreditations globally.

Overlooking the Aberdeen Harbour, The Grove is a six-story campus building which has won international design awards for the innovatively planned spaces that foster joy in learning and creativity. It features a spacious and well-equipped makerspace, marine science center, performance theater, bright and airy library, and a two-storey treehouse. Students also enjoy trips on the Black Dolphin, the school's 50-foot sailboat, which serves as an outdoor classroom moored in the nearby marina.

In keeping with the school's ethos of personalized learning, secondary students enjoy small classes at the Garden campus which features an "urban college" feel, also in Ap Lei Chau and a short five-minute walk from the Grove. The school offers a wide range of innovative and interdisciplinary courses taught at honors, core and supported coursework for qualifying students in their pursuit of a US High School Diploma.

THS implements student-centred ideas and practices, engaging its students in every aspect of school life.

- THS is invested in the individual. We start with understanding that every student is different, with different needs, learning styles and interests. THS provides a range of opportunities to suit each learner.
- THS provides learning environments that are safe, exploratory, exciting, inspiring and our programs are experiential because children learn best when they are happy and engaged.
- The THS ethos focuses on the whole child. To do this, teachers really know their students, above and beyond their academic strengths and challenges. All teachers work collaboratively so that there is a rich and in-depth understanding of each student's strengths, interests and abilities.

Applications for admission are on a rolling basis and are now being accepted. For more information, please visit our website: [www.ths.edu.hk](http://www.ths.edu.hk).

# What did we do at school today?

Learning is a voyage in curiosity every day at The Harbour School. Our students are provided with unique opportunities to explore their learning, hands-on. Whether it's studying the life-cycle of moon jellyfish at our Marine Science Center, project managing school development in Kenya or engineering solar-powered ovens at our makerspace, The Foundry, our students can't wait to embark on tomorrow's next adventure.

**Curious? We always are.**
