Success Story

Mars Wrigley saw app installs soar whilst also comparing assets effectiveness using Brand Lift Study

The Objective: Mars Wrigley wanted to make sure fans could still celebrate Halloween from home, launching TREAT TOWN™, a first-ever digital experience allowing users to send candy virtually to friends and family. The brand turned to TikTok to help increase awareness and drive app installs.

The Solution: The brand amplified reach via **TopView Video** and utilised **Brand Lift Study** to measure the impact of campaign on brand KPI such as awareness and intent through a brief survey

NICE

27%

lift in ad recall

14%

lift in awareness

13%

lift in brand association

Unlock business growth with TikTok's holistic measurement solutions

Tune-In lift measurement

Using a trusted 3P Party Vendor to track which programs are playing on TVs in homes and attribute that viewership to TikTok campaign exposure. TikTok exposure group is then compared against a control group to demonstrate differences in viewership behaviors.

Now Available: US

[Learn More](#)

+159%

Average Lift In Tune-Ins¹

+26%

Lift In Average Watch Time against Control Group¹

45%

Of Tiktok Tune-Ins Were Not Influenced By Linear Ad Exposure¹

1.2x

More Cost Efficient Tune-In compared to linear ad exposure¹

Attribution Analytics

Attribution Analytics is a first-party insight dashboard that visualizes changes in campaign conversions across different time windows (click-through and view-through attribution windows), helping you find an attribution strategy that works for your business.

Now Available: Global

[Learn More](#)

When enabled VTA + CTA

VTA - View Through Attribution
CTA - Click Through Attribution

79%

Improvement in Conversion Rate²

Pro Tip: When choosing the best attribution window for your campaigns, consider the nature of the product or services you're promoting, and the primary actions you want to trigger. If possible, maximise your lookback window to capture effectiveness of Ad

Pro Tip 2: Enable VTA + CTA to get a holistic view in campaign performance

Multi-touch attribution

Using trusted 3rd Party Vendors' statistical modelling system to distribute credit to touch points in a user's path to conversion. It results in more accurate and unified measurement for cross-channel / online vs offline / incremental studies.

Now Available: Global

[Learn More](#)

8.8x

Revenue attributed compared to last-click attribution³

Conversion Lift Study

Conversion Lift Study (CLS) uses experimentation to identify the causal impact of TikTok on your business. It helps to measure the "incremental" conversions ie. the conversions that happened as a result of your campaign.

Now Available: Global

[Learn More](#)

54%

Incremental conversions using Spark Ads, measured by CLS⁴

Post-purchase survey

Leverage the customer's voice to reveal top sources of brand discovery. Use Post-purchase survey (PPS) to understand where your customers are coming from, duration they took to convert and assess channel effectiveness.

Now Available: Global

[Learn More](#)

34%

of users click on TikTok ads outside of a 28 days window⁵

Success Story

With Post-purchase surveys, Momentary Ink learned that 60% of customers discovered the brand on TikTok

The Objective: Summer is peak season for showcasing skin art, and the brand worked with TikTok and agency partners to design a strategy that would capture the attention of our audience and drive purchases in a cost-effective way

The Solution: The brand amplified reach via **In-Feed Video** and utilised **Post-Purchase Survey** to highlight the power of discovery to fuel business!

60%

of buyers said they discovered the brand on TikTok

22%

more efficient CPA
