INTRODUCTION

Verint Community is a social community platform with tools to help foster collaboration, sharing, and user involvement. MarineNet users will have the ability to request a Group site, with the intention of building a membership based on organizations and Command relationships.

APPLICATIONS

- Blog
- Calendar and Events
- Forum
- Ideation
- Gallery
- Wiki
- Knowledge Collection
- Chat

*For more information on applications, please visit Verint Community

COMMUNITY GROUP

- A group is organized like a "neighborhood," with users, applications, and some common characteristic or point of interest such as technology questions.
- Group management allows users design user interface, manage permissions, add widgets, monitor group members, and create subgroups.
- There are different types of groups, which makes it possible to control degrees of visibility and access.
- The different group types include:
  - Public Open
  - Public Closed
  - Private Open
  - Private Closed
- For more information on groups please visit Verint Community.
