

INTRODUCTION

Self-paced courses hosts electronic distance learning (EDL) courses, which is part of Legacy MarineNet. These "self-paced courses" are education and training designed to fit the hectic schedule of today's Marine Corps. Self-paced courses can send completion data to MCTFS.

STUDENT FEATURES

- Complete annual training requirements
- Access to official and unofficial transcripts
- Identified curricula and courses transfer results to official military record in MCTFS and are made available in MOL from the Basic Training Record

TYPES OF COURSES

- Annual Training
- MOS Training
- Common Skills

COURSE SPONSORS

The College of Distance Education and Training's (CDET) Digital Content Department (DCD) partners with requesting organizations (sponsors) to support self-paced training requirements. The sponsor is responsible for providing the content, assisting with design, and reviewing each phase of development to ensure content accuracy.

SOME FACTS

Most self-paced courses are classified as interactive multimedia instruction. These courses are designed to support students without an instructor and include a variety of practical exercises, preliminary and end-of-course exams, and checks on learning.

Exam Proctoring

A proctor is tasked with supervising and monitoring students during examinations to ensure they are aware of and adhere to the exam requirements. Any MarineNet student, meeting the following criteria, can proctor:

- Completed the Proctor Certification course (MNET0110PC)
- E-6 or above, active or retired (E-5 or above for EPME3000AA or EPME4000AA)
- Senior in rank to the student
- Not enrolled in the same course

Other individuals eligible to proctor:

- Training managers (only for students in their RUC/MCC)
- Inspector-instructors
- Gov't supervisors (GS-7 or above)

Training Manager (TM)

If you meet the requirements, you can request to be a TM using the TM Role Request. The requirements are: having a minimal job rating (E-5, GS-05, NF-03, WG-09, WL-01, WS-01 or higher) and a billet that requires you to track training.
