MEMORANDUM

Date: July 11, 2022

To: Wildlife Board and Regional Advisory Council Members

From: Chelsea Duke, Wildlife Lands Coordinator

Subject: **2022 Use of Division Lands rule (R657 -28) change recommendation**

The DWR's Habitat section has worked over the last several months to make changes to the Use of Division Lands rule (R657-28). The rule provides the standards and procedures for how we manage DWR lands, as well as the uses that take place on those properties. Below is a summary of the proposed changes and other pertinent information in the rule.

- Full restructure of the rule, condensing information by subject, and moving from 32 sections to 9 sections. Each subject now has their own section for improved flow and understanding.
- Removed obsolete or outdated practices from the entire rule.
- Added or modified several definitions to improve clarity, including lease, special use permit, termed easement, and wood product permit.
- Added a definition for motorized vehicle. This definition now includes electronic bicycles. The definition only includes Class II and Class III e-bikes, which have a throttle.
- Modified the unlawful uses section to remove all unlawful uses already covered in statute (Utah Code Section 23-21-7).
- Added additional language to unlawful uses that are not already described in Utah Code, such as posted closures, additional structures, and occupying Division lands for residential purposes.
- Modified the unlawful use of motorized vehicles except as authorized. Using the newly created definition for motorized vehicles, this unlawful use now includes e-bikes. This now puts the waterfowl management area rule and e-bikes policy in alignment with Division lands.

- Consolidated Domestic Livestock Grazing into one section. Restructured the section to improve clarity.
- Removed all contractual language from the Domestic Grazing section. This will help clarify expectations for applicants and the Division, and leave individual clauses for the final contract.
- Defined the solicitation procedure for the Division, added additional flexibility to improve how we solicit and how to select the best applicant.
- Consolidated wood products, seed harvesting, and extraction of sand, gravel, cinders and ornamental rock into one section called Saleable Products.
- Moved the Water section further down in the rule. Minor changes to language to be consistent through the rule.
- Removed the agricultural lease section and incorporated it into the Termed Easement and Lease section. All property rights are handled the same way, this consolidation will clarify expectations for the Division and applicants.
- Removed the step by step sections (R657-28-23 through -30) for right-of-way leases, leases and special use permits. Replaced them with individual sections for termed easements and leases, and special use permits, since they are handled very differently.
- Rewrote special use permit section to clarify expectations for applicants and the Division, making the process shorter and more straightforward. Detailed the application process, approval process and compensation requirements
- Added an option for a small late fee for applicants who do not turn in requests at least 30 days before their proposed activity.
- Rewrote termed easement and lease section to clarify expectations for applicants and the Division, making the process more in line with current processes. Clarified the application process, approval process and compensation requirements.
- Removed all language specific to each permit or agreement, giving the Division and the applicant the flexibility to address issues on a case-by-case basis.

(d) Any party in default on a previous obligation to the division may be disqualified from obtaining a grazing permit from the division.

(e) In the event an unanticipated prescribed grazing treatment is necessary for [a] division [property]lands, the division [~~reserves the right to~~]may enter into a contract with any livestock operator the division determines can provide the prescribed grazing treatment in a timely manner without soliciting competitive proposals; however, grazing permits issued under this paragraph shall not contain an option to renew and the duration shall be limited to the current grazing season[~~in duration~~].

- (a) management objectives for division lands;
- (b) unlawful uses and activities on division lands;
- (c) application procedures and administration on division lands for special use permits; termed easements; leases; grazing permits; seed harvesting; wood products removal; water uses; and sand, gravel, and cinder extraction.

(2) The division may approve a land use only if, in the opinion of the division, such use:

- (a) does not unreasonably conflict with the intended use or purpose of the property or is not detrimental to wildlife or wildlife habitat; or
- (b) the impacts can be avoided, minimized, rectified, mitigated or compensated.

(3) The division may not authorize a land use under this rule without first obtaining the written approval of persons or entities, if any, holding contractual, funding or proprietary interests in the subject property.

(4) Notwithstanding Subsection 23-21-2(6), nothing in this rule shall prevent the division from closing division lands to public use or activity if the division determines that the disturbance from the use or activity is detrimental to wildlife or wildlife habitat.

(3) Grazing permits may be issued by the division through a proposal solicitation to achieve the division's vegetation or habitat management goals.

(a) Proposals for grazing permits may be solicited through publication on the division website and/or in one or more newspapers of general circulation in the county in which the grazing permit is offered. Notification may be sent to landowners adjoining the subject division lands, and to livestock operators having federal permits to graze a federal allotment adjacent to division lands.

(d) Any party in default on a previous obligation to the division may be disqualified from obtaining a grazing permit from the division.

(e) In the event an unanticipated prescribed grazing treatment is necessary for division lands, the division may enter into a contract with any livestock operator the division determines can provide the prescribed grazing treatment in a timely manner without soliciting competitive proposals; however, grazing permits issued under this

- (8) The division may amend or alter the provisions of the grazing permit contract.
- (9) Grazing permits are non-transferable without the prior written consent of the division.

- (11) Trailing and staging livestock across or on division lands:
 - (a) Unless a party has a recorded right-of-way to trail livestock across division lands, prior written approval must be obtained from the division for trailing livestock across division lands.

MEMORANDUM

TO: Utah Wildlife Board

FROM: Kenny Johnson

DATE: 7/7/2022

SUBJECT: Proposed Fee Changes

MESSAGE

This memo is regarding proposed changes to the fee schedule. We will be proposing to increase hunting, fishing, and combo licenses as well as general season deer and general season elk by \$6.00 for residents. The \$1.00 discount per year for extensions and multi-year licenses will remain in effect. Resident youth and disabled veteran fees will not be increased. Most other fees will be increased by 10% on average. Target and percentage increases will be proposed for nonresidents as well. There are some additional housekeeping items proposed to remove inactive fees, include combo licenses for possible marketing discounts in the future, and adding some flexibility to our pricing at our shooting ranges. See handout for specifics.

Leases and Easements - Resulting in Long-Term Uses of Habitat	Variable			
Fees shall be determined on a case-by-case basis by the division, using the estimated fair market value of the property, or other legislatively established fees, whichever is greater, plus the cost of administering the lease, right-of-way, or easement. Fair market value shall be determined by customary market valuation practices.				
Special Use Permits for non-depleting land uses of < 1 year	Variable			
A nonrefundable application of \$50 shall be assessed for any commercial use. Fees for approved special uses will be based on the fair market value of the use, determined by customary practices which may include: an assessment of comparable values for similar properties, comparable fees for similar land uses, or fee schedules. If more than one fee determination applies, the highest fee will be selected.
