Subject: National Tsunami Warning Center Routine Communications Tests for
the West Coast and Alaska Coast to Take Place on November 23, 2022

The NWS National Tsunami Warning Center (NTWC) and coastal NWS Weather
Forecast Offices (WFOs) will perform a routine monthly tsunami
communication test on Wednesday, November 23, 2022.

The intended recipients of these communication tests include: designated
national focal points, state/territorial warning points, coastal WFOs,
U.S. Coast Guard and critical military dissemination points.

VTEC codes for the test messages will start with the /T fixed identifier
(versus /O for operational messages). To provide additional assurance
that a test message is not inadvertently distributed as an actual
Warning/Advisory/Watch product, the Event Tracking Numbers (ETNs) for the
test messages will begin with 9 as the leading digit of the four character
code.

The text products affected by routine monthly tsunami communication
testing are the national tsunami products issued under the following
Advanced Weather Interactive Processing System (AWIPS) Product Identifiers
(PILs) and World Meteorological Organization (WMO) Identifiers (IDs):

NTWC Product	AWIPS PIL	WMO ID
-----	-----	-----
Segmented Tsunami W/W/A for West Coast/BC/Alaska	TSUWCA	WEPA41
Public Tsunami W/W/A for West Coast/BC/Alaska	TSUAK1	WEAK51
