Subject: National Tsunami Warning Center Routine Communications Tests for  
the West Coast and Alaska Coast to Take Place on May 25, 2023

The NWS National Tsunami Warning Center (NTWC) and coastal NWS Weather  
Forecast Offices (WFOs) will perform a routine monthly tsunami  
communication test to ensure end-to-end readiness of NWS dissemination  
software and hardware on Thursday, May 25, 2023.

The intended recipients of these communication tests include: designated  
national focal points, state/territorial warning points, coastal WFOs,  
U.S. Coast Guard and critical military dissemination points.

VTEC codes for the test messages will start with the /T fixed identifier  
(versus /O for operational messages). To provide additional assurance  
that a test message is not inadvertently distributed as an actual  
Warning/Advisory/Watch product, the Event Tracking Numbers (ETNs) for the  
test messages will begin with 9 as the leading digit of the four character  
code.

The text products affected by routine monthly tsunami communication  
testing are the national tsunami products issued under the following  
Advanced Weather Interactive Processing System (AWIPS) Product Identifiers  
(PILs) and World Meteorological Organization (WMO) Identifiers (IDs):

NTWC Product	AWIPS PIL	WMO ID
-----	-----	-----
Segmented Tsunami W/W/A for West Coast/BC/Alaska	TSUWCA	WEPA41
