From: Stephen Bieda III, Chief
 Severe, Fire, Public and Winter Services Branch

Subject: Termination of the Weather Prediction Center Day 3-7 Hazards
 Outlook Discussion Effective November 15, 2023

Effective November 15, 2023, the NWS will discontinue the discussion portion of the Weather Prediction Center (WPC) Day 3-7 Hazards Outlook. The WPC Day 3-7 Hazards Outlook will otherwise remain unchanged and will continue to be available in graphical form via a static image, shapefiles, KML files, and in an embedded interactive map at the following link:

<https://www.wpc.ncep.noaa.gov/threats/threats.php>

Removal of the WPC Day 3-7 Hazards Outlook Discussion will reduce workload and duplication of information. WPC produces two other medium range (covering days 3-7) outlook discussions, one for the CONUS and one for Alaska, which include a section specifically for hazard information. These discussions can be found at:

CONUS Extended Forecast Discussion (PMDEPD):
<https://www.wpc.ncep.noaa.gov/discussions/hpcdiscussions.php?disc=pmdepd>

Alaska Extended Forecast Discussion (PMDAK):
<https://www.wpc.ncep.noaa.gov/discussions/hpcdiscussions.php?disc=pmdak>.

For additional questions regarding this termination, please contact:

Gregory Carbin
Chief, Forecast Operations Branch
NWS - NCEP/Weather Prediction Center
College Park, MD
gregory.carbin@noaa.gov

Alex Lamers
Warning Coordination Meteorologist
NWS - NCEP/Weather Prediction Center
College Park, MD
alex.lamers@noaa.gov
