From:         Ben Kyger  
              Director, NCEP Central Operations

Subject:      Updated: Temporary Removal of Canadian Radars from the Multi-  
              Radar Multi-Sensor (MRMS) System, Effective June 5, 2023

Updated to indicate that data has been restored.

Effective on or about June 5, 2023, radars operated by Environment and Climate Change Canada (ECCC) will be temporarily absent from Multi-Radar Multi-Sensor (MRMS) system products. ECCC notified users of a change to their radar scanning strategies to be implemented between June 5, 2023 and June 15, 2023. As each Canadian radar was switched to the new scanning strategy, that radar was removed from MRMS products.

Work to patch the MRMS system was completed on November 28, 2023 that restores ECCC radars to MRMS using the new scanning strategy.

For questions regarding the operational application, please contact:
