From: Stephen Bieda III, Ph.D., Chief
 Severe, Fire, Public, and Winter Weather Services Branch

Subject: Updated: Changes to Public Weather Forecast Zones for WFO
Anchorage, AK: Effective September 10, 2024

Updated to correct new zone names in Table 3 for AKZ713 and AKZ714.

Effective Tuesday, September 10, 2024, at 1:00 PM Alaska Daylight Time (AKDT), 2100 Coordinated Universal Time (UTC), the NWS Weather Forecast Office in Anchorage, Alaska (AFC) will change Public Weather Forecast Zones throughout the County Warning Area (CWA). After this change, all forecasts and related products will use the zone numbers and names shown below.

If September 10, 2024 is declared a Critical Weather Day, this implementation will be postponed to September 11, 2024 at 2100 UTC.

These changes will result in a more geographically precise forecast, watch and warning products for the general public and fire partners, and enhance web-based graphical product consistency and appearance. These changes are also intended to help reduce the overalerting effects from the current zones in warnings via NOAA Weather Radio All Hazards (NWR) and the Emergency Alert System (EAS) dissemination modalities.

The 17 current zones will be converted into 51 separate zones. The new zones are listed in Tables 3 and 4. Although all zone numbers are changing, a few zones are retaining the same name due to changes in boundaries being minor. In Alaska, all Universal Geographic Codes (UGC) use the UGC-Zone (UGC-Z) format.

Table 1. Universal Geographic Codes (UGC): Current Public Forecast Zone Names (Southcentral Alaska Domain)

AKZ101: Anchorage
AKZ111: Matanuska Valley
AKZ121: Western Kenai Peninsula
AKZ125: Prince William Sound
AKZ131: Northeast Prince William Sound
AKZ135: Southeast Prince William Sound
AKZ141: Copper River Basin

AKZ145: Susitna Valley
AKZ171: Kodiak Island
Table 2. UGCs: Current Public Forecast Zone Names (Southwest Alaska Domain)

AKZ153: Middle Kuskokwim Valley
AKZ155: Kuskokwim Delta
AKZ161: Greater Bristol Bay
AKZ181: Alaska Peninsula
AKZ185: Eastern Aleutians
AKZ187: Central Aleutians
AKZ191: Western Aleutians
AKZ195: Pribilof Islands

Table 3. UGCs: New Public Forecast Zone Names (Southcentral Alaska Domain)

AKZ701: Anchorage / Eagle River (lower elevations)
AKZ702: Anchorage Hillside / Upper Eagle River
AKZ703: Turnagain Arm
AKZ704: Portage
AKZ711: Lower Matanuska Valley
AKZ712: Hatcher Pass
AKZ713: Sutton / Upper Matanuska Valley
AKZ714: Eureka / Tahneta Pass
AKZ721: Southern Kachemak Bay
AKZ722: Southwest Kenai Peninsula
AKZ723: Northwest Kenai Peninsula
AKZ724: Skilak Lake / Eastern Sterling Highway
AKZ725: Southern Kenai Mountains / Seward
AKZ726: Interior Kenai Peninsula
AKZ727: Turnagain Pass
AKZ728: West Prince William Sound and Whittier
AKZ729: Tyonek
AKZ731: Valdez
AKZ732: Thompson Pass
AKZ735: Cordova
AKZ741: Northern Copper Valley
AKZ742: Western Copper Valley
AKZ743: Central Copper Valley
AKZ744: Ernestine
AKZ745: Western Susitna Valley
AKZ746: Southern Susitna Valley
AKZ747: Central Susitna Valley
AKZ748: Northern Susitna Valley
AKZ749: Southern Copper Valley
AKZ750: Tok Cutoff
AKZ751: McCarthy
AKZ771: Kodiak Island Northeast
AKZ772: Kodiak Island Southwest
AKZ773: Chignik

Table 4. UGCs: New Public Forecast Zone Names (Southwest Alaska Domain)

```

-----
AKZ752: Kuskokwim Valley West
AKZ753: Kuskokwim Valley East
AKZ754: Lime Village
AKZ755: Kuskokwim Delta Coast and Nunivak Island
AKZ756: Inland Kuskokwim Delta
AKZ757: Western Capes
AKZ763: Bristol Bay Borough (Naknek and King Salmon)
AKZ764: Northern Bristol Bay Coast
AKZ765: Inland Bristol Bay
AKZ766: Lake Iliamna / Nanvarpak / Nila Vena
AKZ761: Central Alaska Peninsula
AKZ762: Northern Alaska Peninsula
AKZ781: Alaska Peninsula
AKZ785: Eastern Aleutians
AKZ787: Central Aleutians
AKZ791: Western Aleutians
AKZ795: Pribilof Islands

```

Short Term Forecast	FPAK78 PAFC	NOWAFC

NWS partners and users will need to make necessary changes to their communications systems to accommodate these weather forecast zone changes.

NWR users with Specific Area Message Encoding (SAME) receivers do not need to make any changes to their current SAME location code or to the transmitter they have been monitoring to continue receiving warning notifications for their county equivalent. However, all listeners will notice the elimination of some existing public forecast zone names and/or the introduction of some new public forecast zone names with NWR broadcasts as detailed in Tables 3 and 4.

Preliminary shapefiles for public weather forecast zones are available online at:

<https://www.weather.gov/gis/PublicZones>
<https://www.weather.gov/gis/Counties>

Since there are NWS partners with systems associating NWS public zones with county equivalent names and/or Federal Information Processing Series (FIPS) codes, the updated zone-county correlation file is online at:

<https://www.weather.gov/gis/ZoneCounty>

Final versions of these shapefiles will be available on August 26, 2024.

A graphical depiction of this change is online at:
