

WIPO INSPIRE

Vipin Saroha
Innovation and Knowledge Infrastructure Department

WIPO INSPIRE (Index of Specialized Patent Information Reports)

- WIPO INSPIRE serves as a one-stop shop for information on commercial/ national/ regional patent databases. An online platform it provides free access for patent offices, inventors, researchers, and entrepreneurs to comprehensive, unbiased, and structured reports on the features and coverage of the patent databases and search systems.

Launch

- “WIPO INSPIRE is our latest digital product to help innovators spread innovation for the widest human benefit. It is a platform that helps users reach informed decisions on the patent-search tools that suit them best in their work, whether they are examining patents or making R&D related decisions. Patents disclose important technical information that also serves as building blocks for other innovators and innovations. WIPO INSPIRE facilitates this process and we hope that it will pave the way for more innovations to move faster to the market,” said Mr. Tang – Director General WIPO.

ASPI Yes

Database description Derwent Innovation is a proprietary patent research application that provides trusted patent data and tools to monitor technology trends and competitive landscapes, inform FTO opinions, prosecute patents, monetize and license assets and support litigation activities. It provides access to Derwent World Patents Index (DWPI), a curated patent database with editorially curated titles and abstracts, special subject matter classification coding and indexing, and proprietary patent invention-centric family building. Also includes the Derwent Patent Citation Index (DPCI) which indexes backwards and forwards patent and literature citations. DWPI and DPCI are integrated with the full text of patents from a number of patent authorities, including translations for major authorities such as China, Korea and Japan, enabling users to navigate via the DWPI value add through to the associated patent full text
