

ANNEX 2

Tables of health statistics by country, WHO region and globally

Explanatory notes

The statistics shown below represent official World Health Organization (WHO) statistics for selected health-related Sustainable Development Goal (SDG) indicators and selected *13th General Programme of Work* (GPW13) indicators, based on evidence available in early 2020. In addition, summary measures of health, such as (healthy) life expectancy and basic demographic statistics, are included to provide a general indication of the current situation.

These statistics have been compiled primarily from publications and databases produced and maintained by WHO, or United Nations (UN) groups of which WHO is a member. Some statistics have been derived from data produced and maintained by other international organizations and in each instance the source of the data series is provided.

The type of data used for each data series (comparable estimate or primary data) is also provided (1). Comparable estimates are subject to considerable uncertainty, especially for countries where the availability and quality of the underlying primary data are limited. Uncertainty intervals and other details on the indicators and statistics presented here can be found at the WHO Global Health Observatory.¹

The availability of the underlying data is indicated in the annex table of SDGs/GPW13 indicators for country values.² Indicators that are of primary data type are formatted in bold font if the reference year is 2015 or later, and shown in normal font if the reference year is between 2010 and 2014. For comparable estimates, data are formatted in bold font if they were based on underlying primary data from four years preceding the estimate year, in normal font if they were based on underlying primary data outside of the four preceding years and using a faded font if they lacked direct underlying primary data since 2000. The accompanying footnotes provide more details.

Although every effort has been made to maximize the comparability of statistics across countries and over time, data series based on primary data may differ in terms of the definitions, data collection methods, population coverage and estimation methods used. For indicators with a reference period expressed as a range, country values refer to the latest available year in the range unless otherwise noted; the accompanying footnotes provide more details. In some cases, as SDG indicator definitions are being refined and baseline data are being collected, proxy indicators have been presented in this annex; where this is the case, proxy indicators have been clearly indicated as such through accompanying footnotes.

Unless otherwise stated, the WHO regional and global aggregates for rates and ratios are presented as weighted averages when relevant, whereas for absolute numbers they are the sums. Aggregates are shown only if data are available for at least 50% of the population (or other denominator) within an indicated group. For indicators with a reference period expressed as a range, aggregates are for the reference period shown in the corresponding table column heading above the WHO regional values. Some WHO regional and global aggregates may include country estimates that are not individually reported.

Changes in the values shown for indicators reported in previous editions of the World Health Statistics series should not be assumed to accurately reflect underlying trends. This applies to all data types (comparable estimates and primary data) and all reporting levels (country, regional and global). The data presented here may also differ from, and should not be regarded as, the official national statistics of individual WHO Member States.

Note: – indicates that data is not applicable or not available.

- ^a World population prospects: the 2019 revision. New York: United Nations, Department of Economic and Social Affairs, Population Division; 2019 (<https://population.un.org/wpp/>, accessed 20 April 2020). For Member states with less a total population than 90 000; the male, female values are not shown but are included in the regional and global sums. Male and female may not sum to both sexes due to rounding.
- ^b Global health estimates 2016: Life expectancy, 2000–2016. Geneva: World Health Organization; 2018 (<https://www.who.int/data/gho/data/themes/topics/indicator-groups/indicator-group-details/GHO/life-expectancy-and-healthy-life-expectancy>, accessed 20 April 2020).
- ^c WHO Member States with a population of less than 90 000 in 2016 were not included in the analysis.
- ^d Trends in maternal mortality: 2000 to 2017: estimates by WHO, UNICEF, UNFPA, World Bank Group and the United Nations Population Division. Geneva: World Health Organization; 2019 (<https://www.who.int/reproductivehealth/publications/maternal-mortality-2000-2017/en/>, accessed 20 April 2020). WHO Member States with populations of less than 100 000 in 2019 were not included in the analysis. Data availability was defined by the latest year of input data from death registration, household surveys or other sources (<https://www.who.int/reproductivehealth/publications/maternal-mortality-2000-2017/en/>, accessed 20 April 2020).
- ^e Joint WHO/UNICEF Interagency database 2020 of skilled health personnel, based on population based national household survey data and routine health systems. (<https://data.unicef.org/topic/maternal-health/delivery-care/>, accessed 20 April 2020).
- ^f Levels and trends in child mortality. Report 2019. Estimates developed by the UN Inter-agency Group for Child Mortality Estimation. United Nations Children's Fund, World Health Organization, World Bank Group and United Nations Population Division. New York: United Nations Children's Fund; 2019 (<https://www.unicef.org/reports/levels-and-trends-child-mortality-report-2019>, accessed 20 April 2020). Data availability for estimates was defined by the latest year of input data from death registration, population census, household surveys or other sources (<https://childmortality.org>, accessed 20 April 2020).
- ^g AIDSinfo [online database]. Geneva: Joint United Nations Programme on HIV/AIDS (UNAIDS) (<http://aidsinfo.unaids.org/>, accessed 20 April 2020); and HIV/AIDS [online database], Global Health Observatory (GHO) data. Geneva: World Health Organization ([https://www.who.int/data/gho/data/indicators/indicator-details/GHO/new-hiv-infections-\(per-1000-uninfected-population\)](https://www.who.int/data/gho/data/indicators/indicator-details/GHO/new-hiv-infections-(per-1000-uninfected-population)), accessed 20 April 2020). Data availability was defined by the latest year of programme input data from antiretroviral treatment, as informed by UNAIDS.
- ^h Global tuberculosis report 2019. Geneva: World Health Organization; 2019 (https://www.who.int/tb/publications/global_report/en/, accessed 20 April 2020). Data availability for estimates was defined by the latest year of input case notification data from surveillance (<https://www.who.int/tb/country/data/download/en/>, accessed 20 April 2020).
- ⁱ World malaria report 2019. Geneva: World Health Organization; 2019 (<https://www.who.int/publications-detail/world-malaria-report-2019/>, accessed 20 April 2020). Countries without estimates (shown as “-”) are those that are either certified malaria-free or considered to have eliminated malaria (having zero indigenous malaria cases for three or more consecutive years). Data availability was defined by the country estimation method and the latest year of surveillance data.
- ^j Global and country estimates of immunization coverage and chronic HBV infection [online database]. Geneva: World Health Organization; 23 March 2017 update (<http://whohbsagdashboard.com/#global-strategies>, accessed 20 April 2020). Global and regional averages are for the year 2017 from updated analysis. This indicator is used here as a proxy for the SDG indicator. Data availability was defined by the latest year of surface antigen serosurveys that were used as input to the estimation process.
- ^k Neglected tropical diseases [online database], Global Health Observatory (GHO) data. Geneva: World Health Organization (<https://www.who.int/data/gho/data/themes/topics/topic-details/GHO/neglected-tropical-diseases>, accessed 20 April 2020). Data availability was defined by the latest year of reported number of cases from surveillance systems of at least one disease.
- ^l Global health estimates 2016: deaths by cause, age, sex, by country and by region, 2000–2016. Geneva: World Health Organization; 2018 (https://www.who.int/healthinfo/global_burden_disease/estimates/en/index1.html, accessed 20 April 2020). Data availability was defined by the latest year of input cause-of-death data from death registration system (https://terrance.who.int/mediacentre/data/ghe/GlobalCOD_method_2000_2016.pdf, accessed 20 April 2020). CVD: cardiovascular diseases; CRD: chronic respiratory disease.
- ^m WHO Global Information System on Alcohol and Health (GISAH) [online database], Global Health Observatory (GHO) data. Geneva: World Health Organization (<https://www.who.int/data/gho/data/themes/topics/topic-details/GHO/levels-of-consumption/>, accessed 20 April 2020). Data availability for estimates was defined by the latest year of recorded alcohol consumption data from government statistics, country-specific alcohol industry statistics in the public domain, and the Food and Agriculture Organization of the United Nations' statistical database, as compiled by GISAH (<https://apps.who.int/gho/data/node.main.A1039>, accessed 20 April 2020).
- ⁿ Global status report on road safety 2018. Geneva: World Health Organization; 2018 (https://www.who.int/violence_injury_prevention/road_safety_status/2018/en/, accessed 20 April 2020). Data availability was defined by the latest year of reported number of deaths by survey submitted to the WHO Department for Management of Noncommunicable Diseases, Disability, Violence and Injury Prevention (NVI), as of December 2017.
- ^o United Nations, Department of Economic and Social Affairs, Population Division (2020). World Contraceptive Use 2020 (POP/DB/CP/Rev2020). (<https://www.un.org/en/development/desa/population/publications/dataset/contraception/wcu2020.asp>, accessed 20 April 2020). Global and regional aggregates are from the United Nations, Department of Economic and Social Affairs, Population Division (2020). Estimates and Projections of Family Planning Indicators 2020.
- ^p Most recent updates provided by the Population Division, DESA to the SDG Indicators United Nations Global SDG Database (<https://unstats.un.org/sdgs/indicators/database/>, accessed 20 April 2020). Global and regional aggregates are from the World population prospects: the 2019 revision. New York: United Nations, Department of Economic and Social Affairs, Population Division; 2019 (<https://population.un.org/wpp/Download/SpecialAggregates/UNrelated/>, accessed 20 April 2020).
- ^q Primary health care on the road to universal health coverage: 2019 monitoring report. Geneva: World Health Organization; 2019 (https://www.who.int/healthinfo/universal_health_coverage/report/fp_gmr_2019.pdf, accessed 20 April 2020). WHO Member States with a population of less than 90 000 in 2015 were not included in the analysis. Data availability was defined according to the unpublished analysis undertaken related to the above-mentioned report. Faded font indicates 'low' data availability, and bold font indicates 'medium' and 'high' data availability.

- ^r Primary health care on the road to universal health coverage: 2019 monitoring report. Geneva: World Health Organization; 2019 (https://www.who.int/healthinfo/universal_health_coverage/report/fp_gmr_2019.pdf, accessed 20 April 2020). Global and regional aggregates include country data not shown in the table.
- ^s Public health and environment [online database], Global Health Observatory (GHO) data. Geneva: World Health Organization (<https://www.who.int/data/gho/data/themes/public-health-and-environment/GHO/public-health-and-environment>, accessed 20 April 2020). Data availability was defined by the latest year of input cause-of-death data from death registration system (https://terrance.who.int/mediacentre/data/gho/GlobalCOD_method_2000_2016.pdf, accessed 20 April 2020). WASH: water, sanitation and hygiene.
- ^t WHO global report on trends in prevalence of tobacco use 2000–2025, third edition. Geneva: World Health Organization; 2019 (<https://www.who.int/publications-detail/who-global-report-on-trends-in-prevalence-of-tobacco-use-2000-2025-third-edition>, accessed 20 April 2020). Data availability was defined by the latest year of input prevalence data from surveys.
- ^u WHO/UNICEF estimates of national immunization coverage and human papillomavirus (HPV) vaccine coverage estimates [online database]. July 2019 revision For HPV vaccine (last dose in the schedule): Percentage of 15 years old girls received the recommended doses of HPV vaccine is not yet available due to recent introduction and often targeting girls below 15 year of age. Currently performance of the programme in the previous calendar year based on target age group is used as proxy for the SDG indicator. For HPV, all countries are included in the regional and global aggregates. (https://www.who.int/immunization/monitoring_surveillance/data/en/, accessed 20 April 2020). Data availability was defined by the latest year of input coverage data from administrative records, household surveys and other sources (http://www.who.int/entity/immunization/monitoring_surveillance/routine/coverage/WUENIC_input_to_PDF.xls, https://www.who.int/immunization/monitoring_surveillance/data/Coverage_survey_data.xls and http://www.who.int/immunization/monitoring_surveillance/data/HPV_estimates.xls, accessed 20 April 2020).
- ^v OECD.Stat [online database]. Paris: Organisation for Economic Co-operation and Development (<https://stats.oecd.org/>, accessed 20 April 2020). Figures shown here are measured in gross disbursement.
- ^w Data collected with the WHO Essential Medicines and Health Products Price and Availability Monitoring Mobile Application (WHO EMP MedMon) (<https://www.who.int/medicines/areas/policy/monitoring/empmedmon/en/>, accessed 20 April 2020) and Health Action International Medicine Prices, Availability, Affordability & Price Components Database (HAI/WHO) (<https://haiweb.org/what-we-do/price-availability-affordability/price-availability-data/>, accessed 20 April 2020).
- ^x WHO Global Health Workforce Statistics [online database], Global Health Observatory (GHO) data. Geneva: World Health Organization (<https://www.who.int/data/gho/data/themes/topics/topic-details/GHO/health-workforce>, accessed 20 April 2020). Country comparisons are affected by differences in the occupations included. Please refer to the source for country-specific definitions and other descriptive metadata. The global averages were calculated using countries with values between 2013 and 2018. Some country estimates were used that are not shown in the annex table.
- ^y International Health Regulations (2005) Monitoring Framework State Parties Self-Assessment Reporting Tool – e-SPAR platform. Geneva: World Health Organization (<https://extranet.who.int/e-spar/>, accessed 31 March 2020). Responses received as of 23 March 2020. Regional and global averages include territories not shown in the table. For full list of IHR state parties please see https://www.who.int/ihr/legal_issues/states_parties/en/.
- ^z NHA database. Geneva: World Health Organization (<https://apps.who.int/nha/database>, accessed 20 April 2020). The WHO regional and global averages are unweighted. This indicator is presented here because it could constitute the health-related portion of the SDG Indicator 1.a.2. As a composite indicator including several categories of health expenditure, the data availability status was determined by the largest component: government transfers for health. The indicator was classified as documented if a primary source such as a government budget has been used.
- ^{aa} Levels and trends in child malnutrition. UNICEF/WHO/World Bank Group Joint Child Malnutrition Estimates. New York, Geneva and Washington (DC): United Nations Children’s Fund, World Health Organization and the World Bank Group; 2020.
- ^{ab} Trends in anaemia in women and children: 1995 to 2016 (WHO, 2017). Data availability was defined by the latest year of input data from surveys, provided by the WHO Department of Nutrition and Food Safety.
- ^{ac} Global SDG Indicators Database [online database]. New York: United Nations, Statistics Division (<https://unstats.un.org/sdgs/indicators/database/>, accessed 20 April 2020).
- ^{ad} Progress on drinking-water, sanitation and hygiene – 2017 update and SDG baselines. Geneva and New York: World Health Organization and United Nations Children’s Fund; 2017 (<https://washdata.org/sites/default/files/documents/reports/2019-05/JMP-2017-report-final.pdf> accessed 31 March 2019); and Water and sanitation [online database], Global Health Observatory (GHO) data. Geneva: World Health Organization (<https://www.who.int/data/gho/data/themes/topics/topic-details/GHO/water-sanitation-and-hygiene-exposure>, accessed 20 April 2020). The threshold for regional and global estimates is 30 per cent population coverage. Comparable estimates are only shown for countries with recent primary data. Data availability was defined by the latest year that had a measurement of water quality, the latest year with a measurement of one or more sanitation-related variables, and the latest year with a measurement of basic hygiene. These unpublished data were provided by the WHO WASH programme.
- ^{ae} Official development assistance for the water sector (water supply and sanitation, agricultural water resources, and hydro-electric power plants), OECD-CRS, 2018 (<https://stats.oecd.org/Index.aspx?DataSetCode=crs1>, accessed 20 April 2020). Includes CRS purpose codes for water supply and sanitation (CRS 14000), agricultural water resources (CRS 31140), and hydro-electric power plants (CRS 23220).
- ^{af} Public health and environment [online database], Global Health Observatory (GHO) data. Geneva: World Health Organization (<https://www.who.int/data/gho/data/themes/public-health-and-environment/GHO/public-health-and-environment>, accessed 20 April 2020). Data availability was defined by the latest year of input data on household fuels for cooking, heating and lighting from household surveys and censuses (<https://www.who.int/airpollution/data/household-energy-database/en/>, accessed 20 April 2020).
- ^{ag} Public health and environment [online database], Global Health Observatory (GHO) data. Geneva: World Health Organization (<https://www.who.int/data/gho/data/themes/public-health-and-environment/GHO/public-health-and-environment/>, accessed 20 April 2020). Data availability was defined by the latest year of input data on particulate matter ground measurement (<https://www.who.int/airpollution/data/cities/en/>, accessed 20 April 2020) and satellite data.
- ^{ah} Global status report on preventing violence against children 2020. Geneva: World Health Organization [in press].

- ^{ai} Data from World Health Organization, Polio Eradication Initiative, as of 28 February 2020. (Updated information can be found at: http://www.who.int/immunization_monitoring/en/diseases/poliomyelitis/case_count.cfm, accessed 20 April 2020).
- ^{aj} NCD Risk Factor Collaboration (NCD-RisC). Worldwide trends in blood pressure from 1975 to 2015: a pooled analysis of 1479 population-based measurement studies with 19.1 million participants. *Lancet*. 2017;389:37–55. Data availability was defined by the latest year of input data from surveys (<https://ars.els-cdn.com/content/image/1-s2.0-S0140673616319195-mm1.pdf>, accessed 20 April 2020). SBP: systolic blood pressure; DBP: diastolic blood pressure.
- ^{ak} NCD Risk Factor Collaboration (NCD-RisC). Worldwide trends in body-mass index, underweight, overweight, and obesity from 1975 to 2016: a pooled analysis of 2416 population-based measurement studies in 128.9 million children, adolescents, and adults. *Lancet*. 2017;390:2627–42). Data availability was defined by the latest year of input data from surveys ([https://www.thelancet.com/cms/10.1016/S0140-6736\(17\)32129-3/attachment/a71c66f4-af6a-45cc-b74b-b320544ff826/mm1.pdf](https://www.thelancet.com/cms/10.1016/S0140-6736(17)32129-3/attachment/a71c66f4-af6a-45cc-b74b-b320544ff826/mm1.pdf), 20 April 2020).
- ^{al} Non-standard definition. For more details see the Joint UNICEF/WHO database of skilled health personnel (footnote e).
- ^{am} Proportion of institutional births (%) used as proxy for the SDG indicator.
- ^{an} Data pertain to a non-standard age or marital status group. For more details, see the World Contraceptive Use 2020 (footnote o).
- ^{ao} Estimate refers to smoking only, which is expected to be similar to all tobacco use.
- ^{ap} Prevalence of overweight was calculated using BMI-for-age z-scores.
- ^{aq} Estimate extrapolated from earlier year (2015–2017).
- ^{ar} Survey estimate was age adjusted.
- ^{as} Data for capital city only.
- ^{at} Proxy estimate based on cumulative coverage by age 15.
- ^{au} Survey covers age interval 1–5 and estimate was unadjusted.
- ^{av} Survey covers eight regions including Youndé and Douala cities.
- ^{aw} Estimate based on national survey or reported coverage.
- ^{ax} Survey covers 6–59 months.
- ^{ay} Survey covers 0–71 months.
- ^{az} Coverage over 100%. Truncated to 99%. May indicate problems with the accuracy of data.
- ^{ba} Estimate based on subnational data.
- ^{bb} Data collection in March–May 2018.
- ^{bc} Survey covers children 3–5 years old.
- ^{bd} Survey covers 0–4 years old.
- ^{be} Survey pending reanalysis.
- ^{bf} National surveillance system.
- ^{bg} Survey covers 8 regions including Bamako and Kidal cities
- ^{bh} Oedema not considered.
- ^{bi} Omani citizens only.
- ^{bj} Data collection in April–May 2015.
- ^{bk} Health centres only (80% coverage).
- ^{bl} Estimate based on data from different age group.
- ^{bm} For high-income countries with no information on clean fuel use, usage is assumed to be over 95%.
