

Flow Monitoring: Chad

Subnational connectivity network map showing incoming flows during the period April 2017 and December 2019

This map illustrates all the outgoing movements from Chad tracked by the Displacement Tracking Matrix’s Flow Monitoring project. The data comprises the period between 18 April 2017 until 31 December 2019, corresponding to 15,530 of individuals transiting through 4 flow monitoring points (yellow dots) from their admin level 1 of origin (red dots).

Disclaimer: This map is for illustration purposes only. Names and boundaries on this map do not imply official endorsement or acceptance by IOM.

Matrix of outflows:

Most common admin levels 1 of origin by country of destination

Origin (admin level 1)	Libya (10,320)	Niger (2,564)	Sudan (1,624)	Mali (405)	Benin (9)	South Africa (8)
Barh-El-Gazel	26	0	0	0	0	0
Batha	659	7	0	0	0	0
Borkou	143	343	0	32	0	0

Ennedi Est	0	0	0	48	0	0
Ennedi Ouest	147	0	0	0	0	0
Guéra	1781	0	0	16	0	0
Hadjer-Lamis	77	0	0	0	0	0
Kanem	3179	67	7	92	0	0
Lac	86	9	0	27	0	0
Logone Oriental	1065	129	0	0	0	0
Moyen-Chari	12	0	1617	0	0	0
NDjamena	69	2009	0	0	9	8
Ouaddaï	923	0	0	21	0	0
Salamat	332	0	0	0	0	0
Tibesti	1522	0	0	99	0	0
Wadi Fira	883	0	0	70	0	0

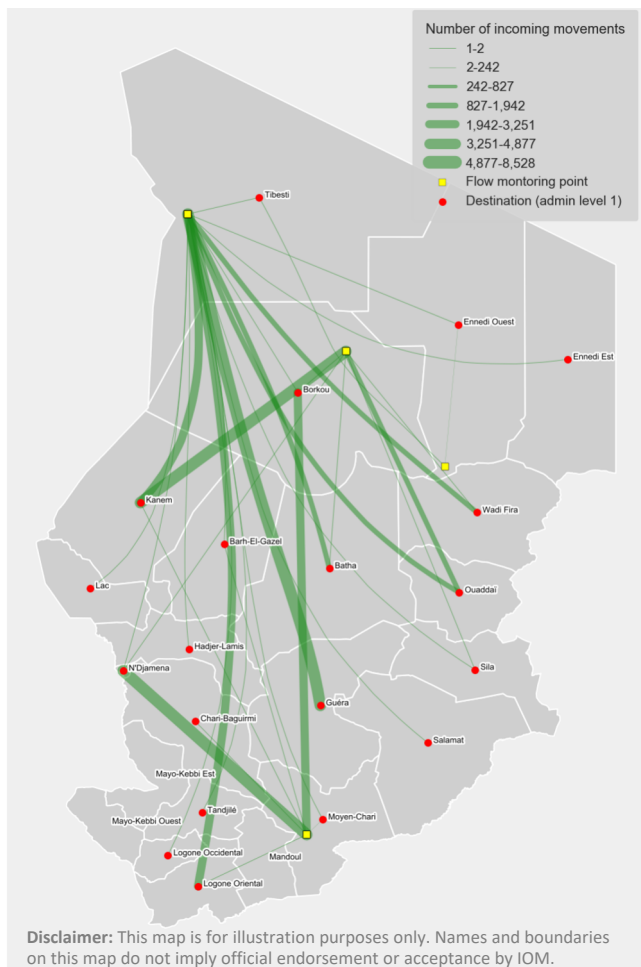

METHODOLOGY: DTM teams collect information at the local level to identify key transit points. Enumerators collect data from key informants (KIs) at the FMPs. Data is collected through a basic form filled out by enumerators following interviews with KIs and combined with direct observations. Data is collected on a daily basis during peak hours.

LIMITATIONS: Data collected for these exercises should be understood as estimations only. They represent only part of the total population flows passing through the flow monitoring points. The spatial and temporal coverage of this data collection activity is therefore incomplete.

Flow Monitoring: Chad

Subnational connectivity network map showing incoming flows during the period March 2017 and December 2019

This map illustrates all the incoming movements captured in Chad by the Displacement Tracking Matrix's Flow Monitoring project. The data comprises the period between 5 March 2017 until 31 December 2019, corresponding to 17,054 of individual movements transiting through 4 flow monitoring points (yellow dots) from their admin level 1 of origin country (red dot).

Matrix of inflows:

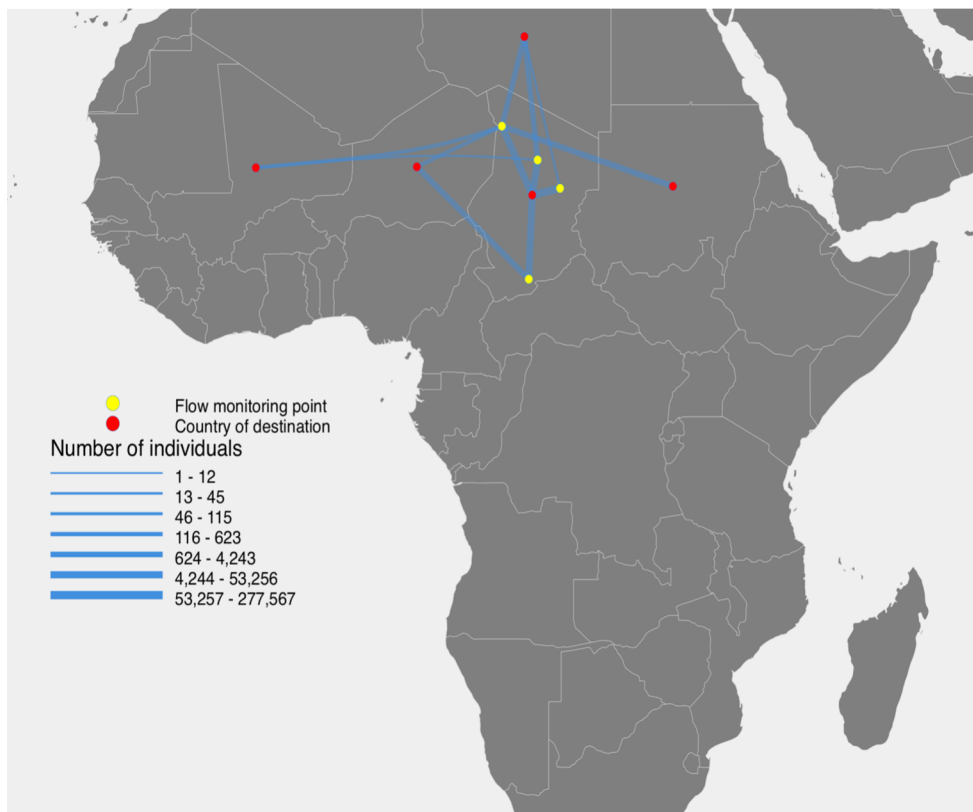

Most common admin levels 1 of destination by country of origin

Flow Monitoring: Chad

International connectivity network map showing incoming flows during the period April 2017 and December 2019

This map illustrates all the outgoing movements from Chad tracked by the Displacement Tracking Matrix's Flow Monitoring project. The data comprises the period between 8 April 2017 until 31 December 2019, corresponding to 426,763 of individuals transiting through 4 flow monitoring points (yellow dots) from their admin level 1 of origin (red dots). Here it is included the internal movements.
