

## Mission of Mercy

### Multiple locations throughout Maryland and Pennsylvania

#### Program Overview

Mission of Mercy is a nonprofit, faith-based community organization that provides free health care to individuals who are economically disadvantaged and have difficulty accessing services. The program's mission is to restore dignity and provide free health care, dental care, and prescription medications to those without insurance, as well as to low-income and homeless populations. The Maryland/Pennsylvania service location, profiled here, is the only Mission of Mercy service location that offers dental services in addition to medical services. The program partners with churches in the service area and a mobile van visits these locations. Health and dental services are provided on the van by a volunteer team of licensed medical and dental professionals.

#### Program History and Development

Mission of Mercy was founded in 1991 to provide free and compassionate care to those who did not qualify for or could not afford health assistance programs. The program began in Maryland, expanding to Pennsylvania in 1995, Arizona in 1997, and Texas in 2007. Mission of Mercy currently operates 17 mobile medical clinics across these four states.

The Maryland/Pennsylvania service location operates a mobile dental clinic that visits six different communities in the region. In each community, the program partners with a church, where the mobile clinic van arrives and is operated on a regularly scheduled basis. The program is focused on expanding services and capacity to serve more individuals. The program is currently raising money for a new multi-chair mobile dental unit.

#### Program Sustainability

- Mission of Mercy partners with the Kahlert Foundation, the Knott Foundation, and the Baltimore Women's Giving Circle.
- The majority of Mission of Mercy's funding comes from donations from churches, individuals, corporations, and employees in the communities that are served.
- As of March 2015, the program was staffed by 12 volunteer dentists and five volunteer dental hygienists or assistants.

#### Program Impact

- Mission of Mercy provides more than 500 dental visits and about 2,500 dental procedures in the Maryland/Pennsylvania service location.
- The Maryland/Pennsylvania service location of Mission of Mercy provided 16,362 dental visits and 68,310 dental procedures to 10,121 individuals as of March 2015.
- According to a 2009 study by the Harvard Medical School, every \$1 spent by Mission of Mercy results in a savings of at least \$18.
