

COVID-19 Statistics

As at 27 June 2022

A Management Information release for Scotland

Publication date: 29 June 2022

About this release

This weekly release by Public Health Scotland presents data on COVID-19 across NHS Scotland.

Main Points

- In the week ending 26 June 2022 there were 14,500 reported COVID-19 cases
- In the week ending 26 June 2022, 2,575 (17.8%) of all cases reported that week were determined to be reinfections when applying the 90-day threshold
- In the latest week ending 26 June 2022, the number of new COVID-19 admissions to hospital increased from 815 to 848 (3.9%) from the week ending 19 June 2022. The highest number of admissions are now in those aged 80+ (24.4%)
- In the week ending 26 June 2022 there were 12 new admissions to Intensive Care Units (ICUs) with a laboratory confirmed test of COVID-19
- In the week ending 26 June 2022, there were on average 1,148 patients in hospital with COVID-19, a 32% increase from the previous week ending 19 June 2022 (870)

Wider Impact Analysis

The response to the COVID-19 pandemic is likely to have a wider impact on health and care as a result of the lockdown, economic pressures and changes to health services.

Background

Since the start of the outbreak, Public Health Scotland (PHS) has been working closely with the Scottish Government and health and care colleagues to support the surveillance and monitoring of COVID-19 amongst the population. There is a large amount of data being regularly published regarding COVID-19 (for example, [Coronavirus in Scotland – Scottish Government](#) and [Deaths involving coronavirus in Scotland – National Records of Scotland](#)). This report complements the range of existing data currently available
