

ONESOURCE Government Connectivity

Connecting with customs authorities around the world is a complex process. Governments and global traders need a way to safely and efficiently exchange the data necessary for an international shipment. Importers and exporters must also understand the reporting requirements specific to that country, such as data format and system specifications.

ONESOURCE® Government Connectivity greatly simplifies the process of direct filing and provides visibility to trade data, allowing companies to mitigate their risk in incorrect filings where there is a dependence upon manual processes. Our software has established connections with governments around the world and is continually updated with country-specific filing requirements. The result is a faster flow of information throughout the supply chain. Trade transaction data is gathered directly from your supply chain partners and can then be distributed to customs, other government agencies, financial institutions, and third-party logistical providers as electronic submissions.

By integrating with your supply chain partners and interfacing directly with customs, you can create a truly seamless trade and customs experience. The software currently supports the following connections:

- ATLAS 9.0 Import (Germany)
- ATLAS AES 2.4 Export (Germany)
- CHIEF/CDS (UK including N. Ireland)
- DELTA-D/DELTA-G (France)
- PLDA (Belgium)
- AGS 3 (Netherlands)
- NCTS (Netherlands)
- Automated Broker Interface (U.S.)
- Automated Export System (U.S.)
- QP/WP (U.S.)
- Glosa (Mexico)
- SAAI (Mexico)
- VUCEM (Mexico)
- SISCOMEX (Brazil)

Thomson Reuters is constantly expanding the list of supported countries. If you do not see a country that you do business in, please ask about the status of our connectivity efforts with that particular government agency.

| Feature | Activity |
|-----------------------------|--|
| Direct filing | Communicate with customs in a safe, secure manner while lowering the transaction costs between business and government |
| Trade facilitation | Improve the quality and speed of customs filings, resulting in smoother border crossings |
| Enhanced compliance | Fulfill country-specific reporting requirements such as data format and system specifications |
| Single platform | File declarations directly without ever leaving the ONESOURCE Global Trade platform |
| Partner integration | Integrate with freight forwarders and 3PLs to reduce the unnecessary rekeying of shipment information |
| Global trade content | Ensure compliance by leveraging up-to-date regulatory data for 210+ countries and territories |
| Audit trail | Store all electronic documentation for internal recordkeeping |

ONESOURCE Export Management

Get your entire supply chain aligned so you can better manage noncompliance, dependencies, and shipping delays. ONESOURCE Export Management is designed to reduce those risks. Our robust export software gives you more control over clearance, screening, and document creation — so you can connect the dots between your export processes and improve compliance.

ONESOURCE Import Management

Managing ever-changing trade regulations from agencies around the world is a major job. ONESOURCE Import Management is an importing software solution that keeps your process running smoothly — which means a lower risk in noncompliance or in the overpayment and underpayment of customs duties. Our world-class import management software gives you control over documents at every stage and keeps information consistent, secure, and linked in a centralized database.

Thrive globally. Compete confidently with ONESOURCE Global Trade Solutions.
