In the course of formation

A resource for each company on the national and international map

Companies

The point is ...

Regensburg and Eastern Bavaria is an economically strong and growing region. In the course of the continuous influx of international businesses and globalisation many local parents find it more and more important to provide their children with an education that is accepted worldwide. This applies particularly to employees who are flexible and internationally oriented. Our region is also becoming increasingly attractive to international companies. These companies will more readily decide to settle in Regensburg if we can provide a reliable international education for the children of their employees and their families.

We want to establish the Regensburg International School (RIS) because we want to enhance the attractiveness of our area; we want to offer international and local families an ideal educational infrastructure and to enable companies to entice more international employees to relocate to Regensburg. At RIS we will follow a worldwide accredited curriculum and we will offer a certificate of secondary education ("Mittlere Reife") as well as the IB Diploma.

RIS will start in September 2008 with the Lower School (Grade 1 and 2) subject to the accreditation of the government of Upper Palatinate.

*Dr. Rudolf Gingele,
1. Chairman Stadtmarketing e.V.,
Vice Chair Sparkasse Regensburg*

Wisdom behind the Words

For years, the city marketing association Stadtmarketing Regensburg e.V. has employed a task force focussed on the topic of “international education” in Regensburg. Its efforts will now be an advantage to the creation of the Regensburg International School.

This remarkable school project is coordinated by Stadtmarketing Regensburg, with additional sponsoring coming from the City of Regensburg and the Chamber of Industry and Commerce (IHK). The local involvement of interested companies, achieved as of October 2006, is supporting the launch phase in an optimal manner. Renowned companies and those who feel an affiliation to the area, such as Continental, Infineon, Krones, Maschinenfabrik Reinhausen, Osram and Siemens, have already made intensive efforts in the formation of the RIS. This network is growing on a daily basis: Parents from the city and region, functionaries from clubs and associations (including sports and culture, etc.) and other dedicated employers are joining the fold.

We will be glad to answer questions, to share information with your employees and families and we would also be delighted to hear from you should you have any suggestions or wish to contribute in any way to the founding of RIS.

Our Partner

The Bavarian International School (BIS) will support Regensburg International School with a background of 16 years of experience and know how and with their highly qualified faculty. BIS opened in 1991 with five students. By 2007 BIS had grown to an enrolment of 660 students from 42 nations. 95 large and medium size companies trust BIS to provide an international education for the children of their employees. We are looking forward to having Regensburg International School provide a similar important and accredited role as part of the infrastructure of Regensburg and Eastern Bavaria.

Please see our website for more detailed information www.ris-school.com. If you wish, we gladly list you for our Newsletter.
