## Personnel Database

The Personnel Database (referred to as the "Personnel Table") is a relational database table containing select personnel information on FCA employees. The data are used by other FCA databases to verify personnel information and as an information system for FCA supervisors. (This information system, known as the "Personnel Listing System," is actually a view of the Personnel Table/Database.) Data includes name of employee, social security number, date of birth, position title, pay plan, grade salary, leave balances, service computation date, and appointment date. The database currently contains data on current FCA employees and those that have left the agency, dating back to 1986.

Storage/Disposition:

**System data:** Revise, correct and update as necessary. Delete data on individual employees from system 6 years after separation or transfer of employee.

**Justification:** In order to retrieve data concerning an employee from the FCA's Agency Time Tracking System, certain data about the employee must be in the Personnel Database. The data in the Agency Time Tracking System must be retained for 6 years per GRS 2, item 7. Therefore, data in the Personnel Database must also be retained for 6 years after an employee separates.
