## MONTHLY FULL REPORT ON MANUFACTURERS' SHIPMENTS, INVENTORIES AND ORDERS MARCH 2024

Release Number: CB 24-64 M3-2 (24)-03
May 2, 2024 - The U.S. Census Bureau announces the March full report on manufacturers' shipments, inventories and orders:

## Summary

New orders for manufactured goods in March, up two consecutive months, increased \$9.1 billion or 1.6 percent to $\$ 584.5$ billion, the U.S. Census Bureau reported today. This followed a 1.2 percent February increase. Shipments, also up two consecutive months, increased $\$ 1.5$ billion or 0.3 percent to $\$ 583.3$ billion. This followed a 1.4 percent February increase. Unfilled orders, up following two consecutive monthly decreases, increased $\$ 6.1$ billion or 0.4 percent to $\$ 1,397.4$ billion. This followed a 0.1 percent February decrease. The unfilled orders-to-shipments ratio was 7.19 , up from 7.10 in February. Inventories, up two consecutive months, increased $\$ 0.4$ billion or virtually unchanged to $\$ 857.7$ billion. This followed a 0.2 percent February increase. The inventories-to-shipments ratio was 1.47 , unchanged from February.

## New Orders

New orders for manufactured durable goods in March, up two consecutive months, increased $\$ 7.3$ billion or 2.6 percent to $\$ 283.3$ billion, unchanged from the previously published increase. This followed a 0.7 percent February increase. Transportation equipment, also up two consecutive months, led the increase,

$\$ 6.9$ billion or 7.8 percent to $\$ 95.9$ billion. New orders for manufactured nondurable goods increased $\$ 1.9$ billion or 0.6 percent to $\$ 301.2$ billion.

## Shipments

Shipments of manufactured durable goods in March, down three of the last four months, decreased \$0.3 billion or 0.1 percent to $\$ 282.1$ billion, down from the previously published virtually unchanged decrease. This followed a 1.1 percent February increase. Transportation equipment, also down three of the last four months, drove the decrease, $\$ 0.5$ billion or 0.6 percent to $\$ 89.3$ billion. Shipments of manufactured nondurable goods, up two consecutive months, increased $\$ 1.9$ billion or 0.6 percent to $\$ 301.2$ billion. This followed a 1.7 percent February increase. Petroleum and coal products, also up two consecutive months, led the increase, $\$ 0.8$ billion or 1.2 percent to $\$ 68.7$ billion.

## Unfilled Orders

Unfilled orders for manufactured durable goods in March, up following two consecutive monthly decreases, increased $\$ 6.1$ billion or 0.4 percent to $\$ 1,397.4$ billion, unchanged from the previously published increase. This followed a 0.1 percent February decrease. Transportation equipment, up twelve of the last thirteen months, drove the increase, $\$ 6.6$ billion or 0.7 percent to $\$ 903.2$ billion.

## Inventories

Inventories of manufactured durable goods in March, down following seven consecutive monthly increases, decreased $\$ 0.1$ billion or virtually unchanged to $\$ 527.8$ billion, unchanged from the previously published decrease. This followed a 0.2 percent February increase. Machinery, down three consecutive months, led the decrease, $\$ 0.1$ billion or 0.1 percent to $\$ 95.0$ billion. Inventories of manufactured nondurable goods, up two consecutive months, increased $\$ 0.5$ billion or 0.2 percent to $\$ 329.9$ billion. This followed a 0.3 percent February increase. Petroleum and coal products, also up two consecutive months, led the increase, $\$ 0.2$ billion or 0.5 percent to $\$ 48.0$ billion. By stage of fabrication, March materials and supplies decreased 0.1 percent in durable goods and increased 0.4 percent in nondurable goods. Work in process increased 0.5 percent in durable goods and decreased 0.1 percent in nondurable goods. Finished goods decreased 0.6 percent in durable goods and increased 0.1 percent in nondurable goods.

The Advance Report on durable goods for April is scheduled for release on May 24, 2024, at 8:30 a.m. EDT and the Full Report on June 4, 2024, at 10:00 a.m. EDT. View the full schedule in the Economic Briefing Room: <www.census.gov/economic-indicators/>. The full text and tables of this release can be found at <www.census.gov/m3>.

## EXPLANATORY NOTES

Figures in text are adjusted for seasonality, but not for inflation. Figures on new and unfilled orders exclude data for semiconductor manufacturing.
"Virtually unchanged" indicates that the change is less than 0.05 percent for a percent increase or decrease.

The Census Bureau has reviewed this data product to ensure appropriate access, use, and disclosure avoidance protection of the confidential source data (Project No. P-6000307, Disclosure Review Board (DRB) approval number: CBDRB-FY24-0254).

## Description of the survey

This report is compiled from results of the U.S. Census Bureau's Manufacturers' Shipments, Inventories, and Orders (M3) survey, which is a voluntary survey authorized by Title 13 of the United States Code. This survey provides statistics on a calendar-month basis for manufacturers' value of shipments, new orders (net of cancellations), end-of-month order backlog (unfilled orders), end-of-month total inventory (at current cost or market value), and inventories by stage of fabrication (materials and supplies, work-inprocess, and finished goods). Data published from the M3 survey are based on a panel of approximately 5,000 reporting units that represent approximately 3,100 companies and provide an indication of month-to-month change for the Manufacturing Sector. These reporting units may be divisions of diversified large companies, large homogenous companies, or single-unit manufacturers in 92 industry categories, which are combined into 65 publication levels due to the small monthly panel size. The survey methodology assumes that the month-to-month changes of the total operations of the reporting units in the M3 panel effectively represent the month-to-month movements of all establishments that make up the category. The companies for which shipments data are currently reported or imputed in the M3 survey represent approximately 60 percent of the total value of shipments for manufacturing establishments in the 2017 Economic Census, and these companies include roughly 61 percent of the manufacturing companies with $\$ 500$ million or more in shipments in the 2017 Economic Census. The companies for which shipments data are currently reported in the M3 survey represent approximately 51 percent of the total value of shipments for manufacturing establishments in the 2017 Economic Census. Statistics based on the M3 panel differ from the results that would be obtained from a complete enumeration of all manufacturing companies. The M3 panel is not based on a probability sample; therefore, the sampling errors that are normally provided with sample surveys cannot be measured. Nonsampling errors are attributable to many

U.S. Department of Commerce U.S. CENSUS BUREAU census.gov
sources. The use of company or divisional reports to estimate the monthly change for establishments is one source of nonsampling error. The use of primarily large companies to represent the month-to-month movement of all companies is another potential source. Any corrections will be published in the full report. Corrections received after the full report will be released in the next month's advance report.

Any revisions made later than two months will be reflected in the annual benchmark publication. Additional survey documentation can be found on our web site: <www.census.gov/manufacturing/m3/how the data are collected/index.html>.

## Notice of Revisions and Changes Due to Updated Seasonal Adjustment Models:

On May 14, 2024, monthly seasonally adjusted data for Manufacturers' Shipments, Inventories, and Orders will be revised for January 2012 through March 2024. There will be no accompanying press release containing revised seasonally adjusted data for January through March of 2024, and historical data not seasonally adjusted will be unchanged. These revisions to the historical seasonally adjusted data will be based on the results of the recent annual review of the seasonal adjustment models. These results of the annual seasonal review will be used to produce seasonally adjusted data from the Manufacturers' Shipments, Inventories, and Orders Survey, beginning with the April 2024 Advance Report on Durable Goods scheduled for release on May 24, 2024, and the Full Report scheduled for release on June 4, 2024. Please call M3 staff on (301) 763-4832 with any questions.

## Special Notice:

Beginning with the release of June 2024 data on July 25, 2024, advance estimates of total manufacturing will include Petroleum and coal products shipments and inventories data, an enhancement of the publication to include an early snapshot of this industry from the monthly Manufacturers' Shipments, Inventories and Orders. These estimates will be available on a seasonally adjusted basis as well as a not seasonally adjusted basis and will be included in the Advance Total Manufacturing Estimates file on the M3 website under the "Latest Monthly Advance report on manufacturers' Shipments, Inventories and Order", Monthly Advance Report on Durable Goods Manufacturers' Shipments Inventories and Orders - Press Releases (census.gov).

## Preliminary

Revised data due to late receipts and concurrent seasonal adjustment.
Estimates of shipments and new orders are for the duration of the period, while estimates of unfilled orders and total inventories are for the end of the period. Not seasonally adjusted estimates of shipments and new orders include adjusted data for non-calendar reporters. Seasonally adjusted estimates include concurrent adjustments for holiday and trading-day differences, where appropriate, as well as seasonal variation, based on the results of the latest annual review of the model parameters. Estimates are not adjusted for price changes.
Estimates and percent changes of shipments for the semiconductor industry are included in computers and electronic products, and all other applicable aggregate totals.
. stimates of manufacturers' shipments, inventories and orders are subject to survey error and revision. One major component of survey error is nonsampling error, survey panel is not a probability sample, estimates of sampling error cannot be calculated. For further details on survey design, methodology, and data limitations see [http://www.census.gov/manufacturing/m3/](http://www.census.gov/manufacturing/m3/)
0254).

## ${ }^{\mathrm{p}}$ Preliminary

${ }^{\mathrm{r}}$ Revised data due to late receipts and concurrent seasonal adjustment.
${ }^{1}$ Estimates of shipments and new orders are for the duration of the period, while estimates of unfilled orders and total inventories are for the end of the period. Not seasonally adjusted estimates of shipments and new orders include adjusted data for non-calendar reporters. Seasonally adjusted estimates include concurrent adjustments for holiday and trading-day differences, where appropriate, as well as seasonal variation, based on the results of the latest annual review of the model parameters. Estimates are not adjusted for price changes.
${ }^{2}$ Data on unfilled orders are not available for the semiconductor industry. Estimates and percent changes for unfilled orders exclude semiconductor industry data.
Note: Estimates of manufacturers' shipments, inventories and orders are subject to survey error and revision. One major component of survey error is nonsampling error, which includes errors of coverage, response, and
nonreporting. Since the survey panel is not a probability sample, estimates of sampling error cannot be calculated. For further details on survey design, methodology, and data limitations see
[http://www.census.gov/manufacturing/m3/](http://www.census.gov/manufacturing/m3/).
The Census Bureau has reviewed this data product to ensure appropriate access, use, and disclosure avoidance protection of the confidential source data (Project No. P-6000307, Disclosure Review Board (DRB) approval number: CBDRB-FY24-0254)
Source: U.S. Census Bureau, Manufacturers' Shipments, Inventories, and Orders (M3) Survey, March Full Report, May 2, 2024. Information on data sources and methodology can be found on our website at <www.census.gov/manufacturing/m3/how_the_data_are_collected/index.html>.

Table 4. Value of Manufacturers' Inventories for Industry Groups ${ }^{1}$
[Estimates are shown in millions of dollars and are based on data from the Manufacturers' Shipments, Inventories, and Orders Survey.]

Preliminary
Revised data due to late receipts and concurrent seasonal adjustment.
${ }^{1}$ Estimates of shipments and new orders are for the duration of the period, while estimates of unfilled orders and total inventories are for the end of the period. Not seasonally adjusted estimates of shipments and new orders include adjusted data for non-calendar reporters. Seasonally adjusted estimates include concurrent adjustments for holiday and trading-day differences, where appropriate, as well as seasonal variation, based on the results of the latest annual review of the model parameters. stimates are not adjusted for price changes.
${ }^{2}$ Estimates of inventories for the semiconductor industry data are included in computers and electronic products, and all other applicable aggregate totals.
Note: Estimates of manufacturers' shipments, inventories and orders are subject to survey error and revision. One major component of survey error is nonsampling error, which includes errors of coverage, response, and nonreporting. Since the survey panel is not a probability sample, estimates of sampling error cannot be calculated. For further details on survey design, methodology, and data limitations see <http: $/ / \mathrm{www} . c e n s u s . g o v / \mathrm{manufacturing} / \mathrm{m} 3 />$
 <www.census.gov/manufacturing/m3/how_the_data_are_collected/index.html>.

${ }^{1}$ Estimates of shipments and new orders are for the duration of the period, while estimates of unfilled orders and total inventories are for the end of the period. Not seasonally adjusted estimates of shipments and new orders include adjusted data for non-calendar reporters. Seasonaly based on the resultso $o$ the latest annal review of the model prameters Estimtes ree not adiusted for price chans based on the results of the latest annual review of the model parameters. Estimates are not adjusted for price changes.
The current month revisions are the difference between the advance percent change and the percent change as show
${ }^{3}$ The twelve month revisions are the differenceses between the month-to-month percent changes of the preliminary and final estimates . The monthly averages are the simple averages of the absolute values of the differences for the months specified. The advance to final percent change
revisions for the durable goods industries are shown in the advance report for the month.
Note: Estimates of manufacturers' shipments, inventories and orders are subject to survivey error and revision. One major component of survey error is nonsampling error, which includes errors of coverage, response, and nonreporting. Since the survey panel is not a probability sample, [http://www.census.gov/manufacturing/m3/](http://www.census.gov/manufacturing/m3/)

    ${ }^{\mathrm{p}}$ Preliminary
    'Revised data due to late receipts and concurrent seasonal adjustment.
    Estimates of shipments and new orders are for the duration of the period, while estimates of unfilled orders and total inventories are for the end of the period. Not seasonally adjusted estimates of shipments and new orders include adjusted data for noncalendar reporters. Seasonally adjusted estimates include concurrent adjustments for holiday and trading-day differences, where appropriate, as well as seasonal variation, based on the results of the latest annual review of the model parameters. Estimates are not adjusted for price changes.
    ${ }^{2}$ Topical series are regroupings of the separate industry categories.
    ${ }^{3}$ Nondefense capital goods industries include: small arms and ordnance; farm machinery and equipment; construction machinery; mining, oil, and gas field machinery; industrial machinery; vending, laundry, and other machinery; photographic equipment; metalworking machinery; turbines and generators; other power transmission equipment; pumps and compressors; material handling equipment; all other machinery; electronic computers; computer storage devices; other computer peripheral equipment; communications equipment; search and navigation equipment; electromedical, measuring, and control instruments; electrical equipment; other electrical equipment, appliances, and components; heavy duty trucks; aircraft; railroad rolling stock; ships and boats; office and institutional furniture; and medical equipment and supplies.
    ${ }^{4}$ Defense capital goods industries include: small arms and ordnance; communications equipment; aircraft; missiles, space vehicles, and parts; ships and boats; and search and navigation equipment
    ${ }^{5}$ Estimates and percent changes exclude semiconductor industry data.
    Based on year-to-date for shipments and new orders, but on same month prior year for unfilled orders and inventories.
    Note: Estimates of manufacturers' shipments, inventories and orders are subject to survey error and revision. One major component of survey error is nonsampling error, which includes errors of coverage, response, and nonreporting. Since the survey panel is not a probability sample, estimates of sampling error cannot be calculated. For further details on survey design, methodology, and data limitations see [http://www.census.gov/manufacturing/m3/](http://www.census.gov/manufacturing/m3/).
    The Census Bureau has reviewed this data product to ensure appropriate access, use, and disclosure avoidance protection of the confidential source data (Project No. P-6000307, Disclosure Review Board (DRB) approval number: CBDRB-FY24-0254).

[^1]:    ${ }^{\mathrm{p}}$ Preliminary
    'Revised data due to late receipts and concurrent seasonal adjustment.
    ${ }^{1}$ Estimates of shipments and new orders are for the duration of the period, while estimates of unfilled orders and total inventories are for the end of the period. Not seasonally adjusted estimates of shipments and new orders include adjusted data for non
    calendar reporters. Seasonally adjusted estimates include concurrent adjustments for holiday and trading-day differences, where appropriate, as well as seasonal variation, based on the results of the latest annual review of the model parameters. Estimates are not adjusted for price changes.
    Note: Estimates of manufacturers' shipments, inventories and orders are subject to survey error and revision.
