

INTERNATIONAL TELECOMMUNICATION UNION

**TSB
TELECOMMUNICATION
STANDARDIZATION BUREAU
OF ITU**

**DIALLING PROCEDURES (INTERNATIONAL
PREFIX, NATIONAL (TRUNK) PREFIX AND
NATIONAL (SIGNIFICANT) NUMBER) (IN
ACCORDANCE WITH ITU-T
RECOMMENDATION E.164 (11/2010))**

(POSITION ON 15 DECEMBER 2011)

Geneva, 2011

Note from TSB

1. This List of "Dialling Procedures" replaces the previous one published as an annex to the ITU Operational Bulletin No. 951 of 1.III.2010. The present list recapitulates all the different amendments that have been published up to Operational Bulletin No. 994 of 15.XII.2011.

2. The list of "**Dialling Procedures**" contains the national (trunk) prefix, the international prefix, the country code and the national (significant) number in accordance with ITU-T Recommendation E.164 (11/2010).

3. The **national (trunk) prefix** is the digit, or combination of digits, which must be dialled before an area (city) code when dialling a call to a subscriber from inside his own country but outside his own numbering area. It provides access to the automatic outgoing trunk equipment. If the entry in this column is blank for a particular country, it means that the country has a single nationwide numbering plan that does not use area codes, and all calls to anywhere in the country are dialled by using the entire local number.

Accordingly, in the international service the trunk prefix of the country of destination must not be dialled. ITU-T recommends that the Administrations of countries which have not yet adopted a trunk prefix or are revising the prefix for access to their national trunk network should adopt a prefix composed of a single digit, preferably "0".

4. The **international prefix** is the digit, or combination of digits, that must be dialled before a country code when dialling a call to a country other than the one from which the call is being placed. If the entry in this column is blank for a particular country, it means that the country does not have direct dialling facilities to other countries (in other words, international calls must be placed through the assistance of an operator).

ITU-T recommends that the Administrations of countries that have not yet introduced automatic international operation or are, for various reasons, revising their numbering plans, should adopt an international prefix (a code for access to the international automatic network) composed of the two digits "00".

5. The **country code** is composed of one digit or is the combination of two or three digits, characterizing the called country which is used to route calls to the required country. It is usually dialled after the international prefix. The List of country codes is also published in the "List of ITU-T Recommendation E.164 assigned country codes", as an annex to the Operational Bulletin.

6. The **national (significant) number** is the number to be dialled following the national (trunk) prefix to obtain a subscriber in the same country but in a different local network or numbering area. The national (significant) number consists of the area code followed by the subscriber number. If the entry in this column is blank for a particular country, it means that the information is missing.

7. For your information, the present List is published as an annex to the ITU Operational Bulletin. Furthermore, the information it contains is also available on the ITU website www.itu.int/itu-t/bulletin/annex.html.

8. Every effort has been made to ensure that the information contained in this Annex is accurate. Administrations are requested to notify all modifications or missing information concerning their national (trunk) prefix, international prefix and the length of their national (significant) number by using the attached form.

9. The designations employed and the presentation of material in this List do not imply the expression of any opinion whatsoever on the part of the ITU concerning the legal status of any country or geographical area, or of its authorities.

Dialling Procedures

Dialling Procedures

Notes

- 1 The length of the national (significant) number N(S)N is 8 digits for geographic numbering and 10 digits for non-geographic numbering (networks and services)..
- 2 The '0' is used on all domestic calls, including in the same city, but is omitted when dialling from other countries.
- 3 When dialling from Ireland to Northern Ireland, the area code used should be '048' instead of '0044 28'.
- 4 Country code 247 Ascension and country code 290 Saint Helena and Tristan da Cunha. Numbers commencing with the initial digit 8 will be assigned to Tristan da Cunha, whilst national numbers commencing with the initial digits 1, 2, 3, 4, 5, 6, 7 and 9 will remain assigned to Saint Helena.
- 5 When dialling from Italy to San Marino, the subscriber number must be prefixed by '0549' instead of '00378'. When dialling from San Marino to Italy, the complete national subscriber number must be used, without prefixing the number by '0039'.
- 6 Western Indonesia including Sumatra, Java, Madura and Bali UTC+7; Central Indonesia including Kalimantan (Borneo), Sulawesi (Celebes) and Nusatenggara (Lesser Sunda) UTC+8; Eastern Indonesia including Maluku (Moluccas) and Irianjaya (Irian) UTC+9.
- 7 Subscriber numbers on PSTN and analogue mobile network consist of 8 digits and those on the mobile network consist of 9 digits.
- 8 Including Australia Antarctic Territory Bases and Norfolk Island (UTC+11.30)(international prefix for Norfolk Island is '0101').
- 9 When dialling from Singapore to Malaysia, the area code and subscriber number must be prefixed by '020' instead of '00160'. When dialling from Malaysia to Singapore, the subscriber number must be prefixed by '02' instead of '0065'.
- 10 Baja California Norte UTC-8/DST-7; Baja California Sur, Chihuahua, Nayarit UTC-7/DST-6.
- 11 Alberta UTC-7/DST-6; British Columbia UTC-8/DST-7; Manitoba UTC-6/DST-5; New Brunswick, Nova Scotia UTC-4/DST-3; Newfoundland UTC-3.30/DST-2.30; Ontario, Quebec UTC-5/DST-4.
- 12 Includes Cocos-Keeling Islands(UTC+6.30) and Christmas Island (UTC+7). Western Australia (UTC+8).
- 13 Reserved for the Palestinian Authority.
- 14 YZ : long-distance operator code.
- 15 The seven and eleven digit schemes are solely for numbers that do not entail any charge for the subscriber making the call (800) or for numbers that involve a surcharge for subscriber A (900). All other numbers have a fixed eight digit scheme.
- 16 The country code listed is for future use (Vatican is currently using country code '39').
- 17 Kaliningrad UTC +2/DST+3; Moscow, St. Petersburg, Astrakhan, Izhevsk, Samara UTC+3/DST+4; Perm, Nizhnevartovsk UTC+5/DST+6; Novosibirsk, Omsk UTC+6/DST+7; Norilsk, Kyzyl UTC+7/DST+8; Bratsk, Ulan-Ude UTC+8/DST+9; Chita, Yakutsk UTC+9/DST+10; Khabarovsk, Vladivostok, Yuzhno-Sakhalinsk UTC+10/DST+11; Magadan, Kamchatka UTC+11/DST+12.
- 18 Other states UTC-3 (no change).
- 19 When dialling between Kenya, Tanzania and Uganda the national (significant) number must be prefixed by 005 for Kenya, by 006 for Uganda and by 007 for Tanzania..
- 20 11 digits for voice-mail services only.
- 21 Eastern Time UTC-5/DST-4; Central Time UTC-6/DST-5; Mountain Time UTC-7; Pacific Time UTC-8/DST-7; Alaska UTC-9/DST-8; Hawaiian UTC-10.
- 22 Carrier pre-selection has been introduced in Mauritius since 1 January 2005. The international prefix "00" may be used only by those subscribers who have pre-selected an International Long Distance (ILD) carrier. For subscribers who have not pre-selected any carrier, their international calls made using the prefix "00" are not allowed through. All subscribers may however select the ILD carrier of their choice on a Call-by-Call basis by using the carrier prefix assigned to the selected carrier, by the ICTA (ILD Carrier Prefix: 020, 022, 030, 033, 040, 050, 060, 070).
- 23 Seven digits for the fixed network and eight digits for the mobile network.
