Message from the Editor-in-Chief

Solar is a new international, open access journal for solar technologies. Climate change is real! Therefore, fast and wide-spread application of solar technologies is of utmost importance. Consequently, *Solar* aims to publish articles which make a real, influential, and often cited contribution not only to basic research and development, but also to the application of photovoltaics as well as to solar thermal conversion. In addition, articles discussing the politics, economy, environmental, and social issues of solar technologies are also welcome. We encourage authors to submit high-quality original articles, letters, and review articles. Our editorial and technical team guarantees a high-quality, fast reviewing process, fast publication, and promotion. With your articles, our journal will rank among the best soon!

Editor-in-Chief

Prof. Dr. Jürgen Heinz Werner

Aims

Solar (ISSN 2673-9941) is an international, peer-reviewed, open access journal of solar thermal energy and photovoltaic systems. It publishes reviews, regular research papers, and communications. Our aim is to publish timely experimental and theoretical research results in a rapid and readily accessible manner.

Scope

The main subject areas include, but are not limited to, the following:

- Photovoltaics (PV)
 - Materials for PV conversion
 - Solar cells, modules, and systems
 - Novel measurement, test, and characterization methods and systems
 - Processes and tools for industrialization
 - High efficiency cells, multijunctions
 - Concentrating PV, space applications
 - PV heating, cooling, and storage systems
 - Power electronics for PV
 - Large area PV power plants
 - Grid integration
 - Stand-alone systems
- Solar Thermal Systems
 - Materials for solar thermal conversion
 - Flat panel collectors
 - Heating, cooling, and storage systems
 - Concentrating systems
 - Solar and hybrid power plants
- Other Topics
 - Economy of solar conversion systems
 - Modeling, yield measurements, forecast, and predictions
 - Environmental issues, recycling, lifetime analysis, degradation
 - Energy policy
 - Radiation measurements and predictions
 - Photochemical conversion

Author Benefits

Open Access

Unlimited and free access for readers

No Copyright Constraints

Retain copyright of your work and free use of your article

Thorough Peer-Review

Discounts on Article Processing Charges (APC)

If you belong to an institute that participates with the MDPI Institutional Open Access Program

No Space Constraints, No Extra Space or Color Charges

No restriction on the maximum length of the papers, number of figures or colors

Rapid Publication

A first decision is provided to authors approximately 16.9 days after submission; acceptance to publication is undertaken in 5.7 days (median values for papers published in this journal in the second half of 2023)
